

**AUCLAIR** ®

2024 SPORT

In 1945, the Auclair brothers, hailing from Loretteville, Quebec, embarked on their journey of crafting latex gloves in a humble workshop. After a few years, driven by an unwavering passion for the wonders of winter, they redirected their efforts towards creating snowmobile mittens. Their unique designs and pioneering use of materials swiftly propelled Auclair into the spotlight within the glove industry, resulting in rapid business expansion. Their fervor for their craft resonated throughout every aspect of their enterprise.

Nearly 80 years of staying true to these original values, Auclair continues to push boundaries and deliver groundbreaking products that prioritize the trifecta of comfort, quality, and performance for outdoor enthusiasts worldwide. We firmly believe that the great outdoors is our playground, and the Canadian winter serves as an enduring muse, sparking our creativity and inspiring rigorous testing of our products in demanding conditions. In our commitment to reduce our ecological footprint, we collaborate with organizations and individuals worldwide, championing the creation of eco-friendly products from the initial design concept to the moment they find a place in your hands.

We invite you to join us on our quest to stay warm and snug throughout the winter while wholeheartedly embracing the vast outdoors. Life, after all, is an adventure, and we're here to ensure you make the most of it.

Proudly Canadian since 1945.

GUIDE

THE ORIGINAL GORE-TEX PRODUCT RANGE

# GORE-TEX GLOVES

TRUSTED PROTECTION AND COMFORT. MAKE MORE OF EVERY DAY.

More comfort. Better protection. Skiers, snowboarders, motorcyclists, and many more outdoor adventurers trust GORE-TEX gloves to keep their hands protected, mobile, and comfortable. As well as all being guaranteed waterproof, windproof, and breathable, gloves made with GORE-TEX product technologies offer a range of additional benefits.

## DURABLY WATERPROOF

The innovative GORE-TEX membrane blocks all water from getting in, so your hands stay drier and more comfortable, even in heavy snow or rain.

## VERY BREATHABLE

The protective membrane in your glove allows sweat vapor to escape, which means you avoid that clammy, uncomfortable feeling.

## TOTALLY WINDPROOF

From strong headwinds to icy gales, wind can't get through the GORE-TEX membrane so your hands stay warmer and more comfortable.

## OUTSTANDING GRIP

Tightly bonded layers in the glove create better grip, so you get the dexterity, tactility, and the confidence you need to go further.

## HIGHLY INSULATED

The unique construction of GORE-TEX Plus Warm gloves insulates you better, keeping your hands warmer, for longer, even in very cold conditions.

## CLIFF GTX WARM

HOW IT WORKS

ENDURING WEATHER PROTECTION AND COMFORT— EVEN IN HARSH CONDITIONS

The glove's inner lining, GORE-TEX membrane, and outer material are brought together in a design to guarantee more comfort and better protection as experienced by the consumer during outdoor activity. As a result, your hands stay warmer when it's cold and drier when you perspire.

# AUCLAIR HEAT

Meet our 3<sup>rd</sup> generation

## Heated glove liners:

powerful heat and lasting warmth

Worn as is or layered under your gloves, our heated glove liners are thin, fitted and designed to deliver a superior degree of heat to keep you warm while you work outside. The powerful battery heats each finger individually and delivers 2X more power than the closest competitor.

Based in Canada, the land of extreme winters, we design the most powerful, simple to use and dependable heated wearables. We are committed to keeping adventurers warm and enabled to perform in the cold.

## Designed in Canada

Canadians know about thriving in the cold. ewool® products are designed and tested in Canada. It's no coincidence we make the most powerful heated wearables in the world.

## Dry and dry again

Our waterproof heating system is designed to withstand the elements and the washing machine so you never have to worry.

## The tech touch

Because the last thing you want to do when it's freezing cold is take your gloves off to use your mobile.

## Flex... ability

Made slim for unparalleled dexterity and comfort, our gloves can be worn as is, or if it's super cold, layered easily under any pair of gloves.

Powerful, all-over warmth

Heated hands and fingers

Effortless charging

Lasts all day

Rugged design

# TECHNICAL INFORMATION

## SHELL

### LEATHER/PALM

Due to the natural pores in the animal skin, leather is one of nature's most breathable materials. Auclair leathers are treated to be resistant to abrasion if permitted to dry naturally.

All leather for ski gloves is drum-dyed which preserves the softness of the skin, the clarity of color and the luxurious feel of the natural leather.

### LEATHER CARE

If leather is wet, dry naturally. Keep away from direct or extreme heat. Wash only with mild saddle soap and water. Avoid using any harsh detergent as this removes the natural oils from the skin.

### GOATSKIN

Specifically tanned for durability, water repellency and suppleness.

### COWHIDE

Cowhide leather is flexible, breathable and supple while conforming to the wearer's hand. It ages well and lasts up to five times longer than fabric. Extremely tear and puncture resistant, it naturally repels moisture, retains its shape and resists sun and heat damage making it ideal for handwear.

### DEERSKIN

Extremely soft, supple and durable. Naturally water resistant yet dries soft after having been wet. The fiber structure of deerskin leather will stay cooler in hotter climates and warmer in colder climates, compared to many other leathers, this quality makes deerskin an extremely versatile "all-season" choice.

### SHEEPSKIN

Natural sheepskin is soft, light, extremely warm and exceptionally durable

### PIGSKIN/PIGSUEDE

Soft, highly breathable due to its porous texture, very flexible, great gripping and very durable.

### Eco

The Eco label is applied on all of our chrome free or veg-tanned leather products. Our Eco line will take more and more place in our company to align our products with our values.

## TECHNICAL SYNTHETIC FABRIC

### GIGATEX

Laminated 2 Way stretch nylon - water repellent, breathable, windproof, flexible and highly resistant to abrasion.

### TASLAN NYLON

Extremely durable fabric with polyurethane water repellent coating to enhance seam strength and durability. Nylon dries quickly and washes well.

### RIPSTOP NYLON

Woven nylon fabric using special reinforcing technique that produces a fabric that is extremely resistant to tearing and ripping. Polyurethane coated for water repellency.

### NEOPRENE

A synthetic rubber material designed to be flexible, resilient and highly resistant to abrasion. Weather resistant with great thermal insulation properties even when wet. Light and comfortable.

### MICROFIBER

Densely woven fine yarns of nylon and/or polyester. Water beads off the surface but allows perspiration to pass through.

### POLYESTER FLEECE

Lightweight, warm, soft napped insulating synthetic hydrophobic fabric. Retains insulating powers even when wet.

### STRETCH FLEECE

Moisture wicking, resilient stretch. Highly breathable. Performance fit and easy care.

### NO-PILL FLEECE

Lightweight, warm and soft. Pilling occurs after frequent usage because of friction of the fibers causing the edges to fray. No-pill or anti-pill fleece resists the pilling.

### MICROFLEECE

Quick-drying, soft, combines warmth and the ability to keep you dry in a low-bulk package.

### POLYTEX

Woven 4-Way Stretch polyester fabric with very strong water repellent spandex. The elasticity in this product is greatly improved

by the special construction of micro fiber spandex in the material. The result is greater freedom of movement and breathability providing the ultimate in fit and comfort.

### SPANDEX

Lightweight, soft. Smooth and supple. Can be stretched repeatedly and still recover to near its original length and shape. Stronger, more durable and higher retractive force than rubber.

### SILK

Great softness, abrasion resistant and optimal thermal regulation.

### WINDBLOCK FABRIC

A wind barrier that provides thermal insulation by blocking wind from penetrating through the fabric. Extremely soft and breathable.

### GORE-TEX INFINIUM™ WINDSTOPPER®

Numb fingers can ruin any day. GORE-TEX INFINIUM™ WINDSTOPPER® gloves block all wind, making them ideal for cycling or running, or just spending a day out with friends. They're also extremely breathable, and feel great against your skin. So if you're halfway through a winter trek, or just rushing around town doing chores, choose gloves that treat your active fingers better.

### OEKO TEX

Certifies non-hazardous end-products and all of their components. Products that carry the Standard 100 label have been tested and proven free of harmful levels of toxic substances which represents Auclair's standards.

## LINING

### BEMBERG

Ultra-soft, 100% polyester brushed fleece for optimal comfort and additional warmth.

### MERINO WOOL

Merino wool is a natural fiber grown by Merino sheep. Compared to regular wool, it is thinner and softer so more comfortable when it is worn for sports purposes. It is known for moisture-wicking qualities, hypoallergenic and regulates the temperature of your body naturally.

# INSULATION

## Thinsulate<sup>™</sup> INSULATION

The unique microfibers of Thinsulate<sup>™</sup> insulation are ten times smaller than the fibers of other synthetic insulations which means warmth without bulk. This premium insulation keeps you warm by trapping and retaining body heat, while keeping low profile loft.

### 3M<sup>™</sup> Thinsulate<sup>™</sup> Water Resistant Insulation

Extreme warmth/high loft alternative to down. Type J insulation has a softer feel that puts your glove with a softer, richer feel. Technology enhancements that put your gloves in a class apart, without sacrificing the breathability, moisture resistance, and exceptional insulating quality for which Thinsulate<sup>™</sup> insulation is known.

### 3M<sup>™</sup> Thinsulate<sup>™</sup> Insulation

Offers one and a half times the warmth of down and nearly twice the warmth of high loft fiberfill insulations when equal weights are compared. Type C is designed for use where a thin, compressible insulation is important. It is breathable, moisture resistant and can be washed or dry cleaned.

**Primaloft<sup>®</sup> Gold** is highest performing synthetic insulation on the market for warmth, water resistance, softness and compressibility. Primaloft Gold is an ultra-fine microfiber insulation that is warm, soft, lightweight and warmer wet or dry than all other insulations.

Our own high loft lightweight polyester insulation provides exceptional warmth without the bulk. Easily washable and maintains its form. Anti-allergenic.

**GOLD:** +150g - up to 200g

**SILVER:** 100g to 150g

**GREEN:** up to 100g

## THERMOLITE<sup>®</sup>

**Thermolite<sup>®</sup>** insulation provides warmth and comfort without weight. Thermolite<sup>®</sup> is hollow-core fibers trap in air for greater insulation for light, yet heavy-duty performance.

### GOOSE DOWN

The lightest, warmest and most compressible insulation available. Providing ultimate warmth by trapping a layer of air within the down, separating the wearer from the outside cold.

### DUCK DOWN

Nature's premium insulation. Down clusters create "loft" that traps air providing optimal thermal regulation. The greater the loft, the warmer the insulation.

**RDS: our down is certified to ensure the feathers come from animals not subjected to unnecessary harm.**

# PROTECTION MATERIAL

### EVA FOAM

This copolymer foam is flexible and offers durable protection.

# PALM MATERIAL

### PALM OVERLAY

Textured TPU or silicone overlay to reinforce existing palm or grip.

### AMARA

Synthetic suede offers same all-weather performance as leather, but in a thinner and more flexible material.

### SILICONE GRIP

Silicone rubber anti-slip printing on palm material for excellent grip.

### AX<sup>®</sup> MATERIALS

AX<sup>®</sup> Materials are specially engineered with the features that gloves need most – from breathability and moisture management to grip and abrasion resistance.

# MEMBRANE SYSTEMS

**AUCLAIR DRY PLATINUM** is a fully waterproof and windproof membrane with a highly breathable ratio. Its porous structure allows perspiration to move through and away from the body to keep you dry. Combined to the best materials, it protects you from the elements in all weather conditions. Three levels of performance have been developed (Platinum - Gold - Silver).

**GORE-TEX** " see page 4 & 5 for detailed information".

# AUCLAIR

## Size Guide

### HAND LENGTH

Measure hand from line under the palm to tip of middle finger

### HAND CIRCUMFERENCE

Measure hand circumference around the knuckles

**DID YOU KNOW?** To determine proper glove/mitt size you must measure your hand length and circumference and use the accompanying size chart to confirm your size.

**HAND LENGTH:** With a tape measure or ruler. Measure from the wrist break line to the tip of the middle finger.

**CIRCUMFERENCE:** Using a soft tape measure, measure around your hand at the knuckles. Both measurements should align on the same size of glove/mitt on the size chart. If the measurements do not align at the same size, please use hand-length as the determining measurement.

Glove/mitt size	HAND LENGTH		HAND CIRCUMFERENCE	
	mm	inches	mm	inches
XS	170 / 180	6 <sup>3</sup> / <sub>4</sub> - 7 <sup>1</sup> / <sub>8</sub>	150 / 180	6 - 7
