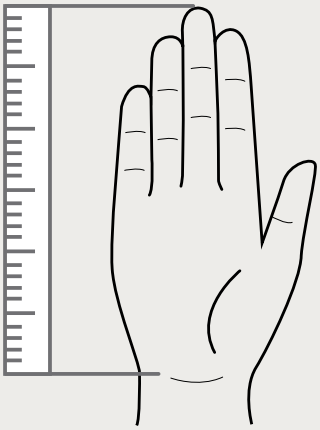
Size Guide

DID YOU KNOW? To determine proper glove/mitt size you must measure your hand length and circumference and use the accompanying size chart to confirm your size.

HAND LENGTH: With a tape measure or ruler. Measure from the wrist break line to the tip of the middle finger.

CIRCUMFERENCE: Using a soft tape measure, measure around your hand at the knuckles. Both measurements should align on the same size of glove/mitt on the size chart. If the measurements do not align at the same size, please use hand-length as the determining measurement.



HAND LENGTH
Measure hand from line under the palm to tip of middle finger
