Shortcuts Companion Introduction

XENX SHORTCUTS COMPANION

XENX Shortcuts Companion is a shortcut controller designed for iPad. It is the ultimate tool for streamlining your workflow and maximizing your productivity.

This compact and versatile device puts all your favorite shortcuts and commands right at your fingertips, allowing you to easily and quickly navigate through your most-used applications and programs.

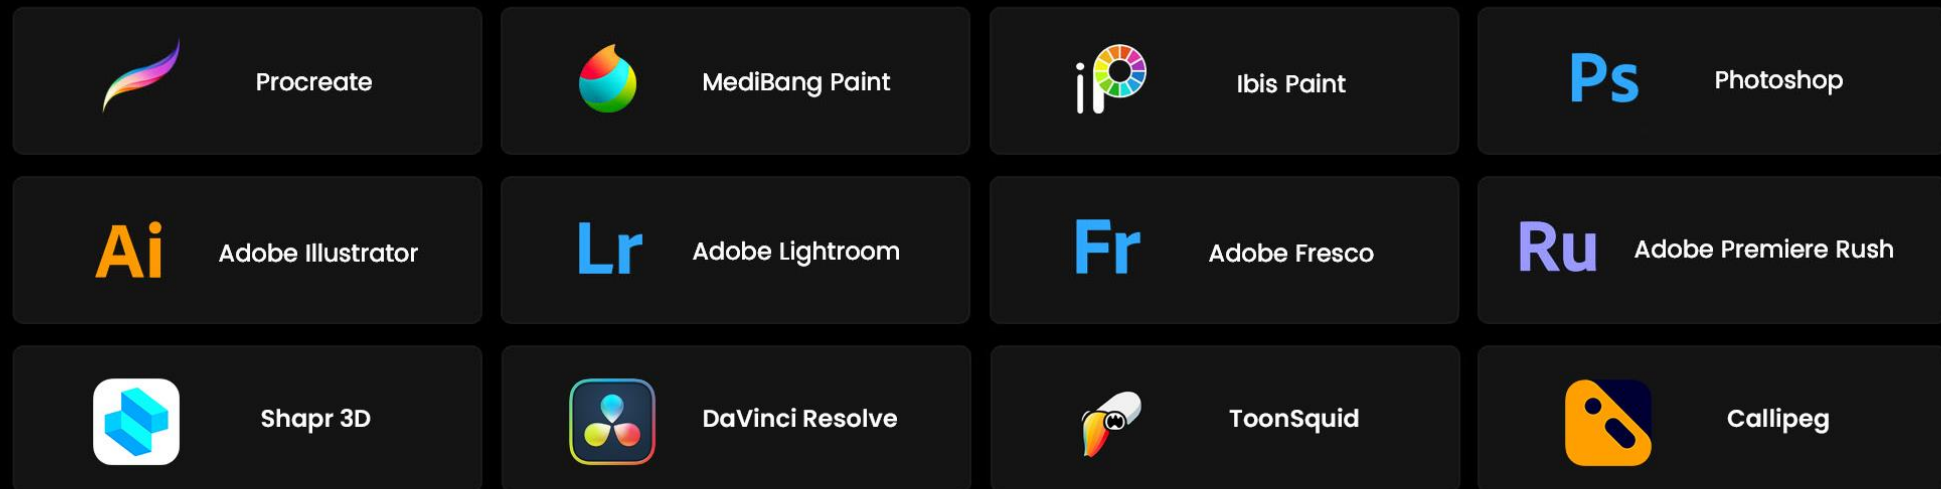

SC-01

SC-02

Not Only for One App

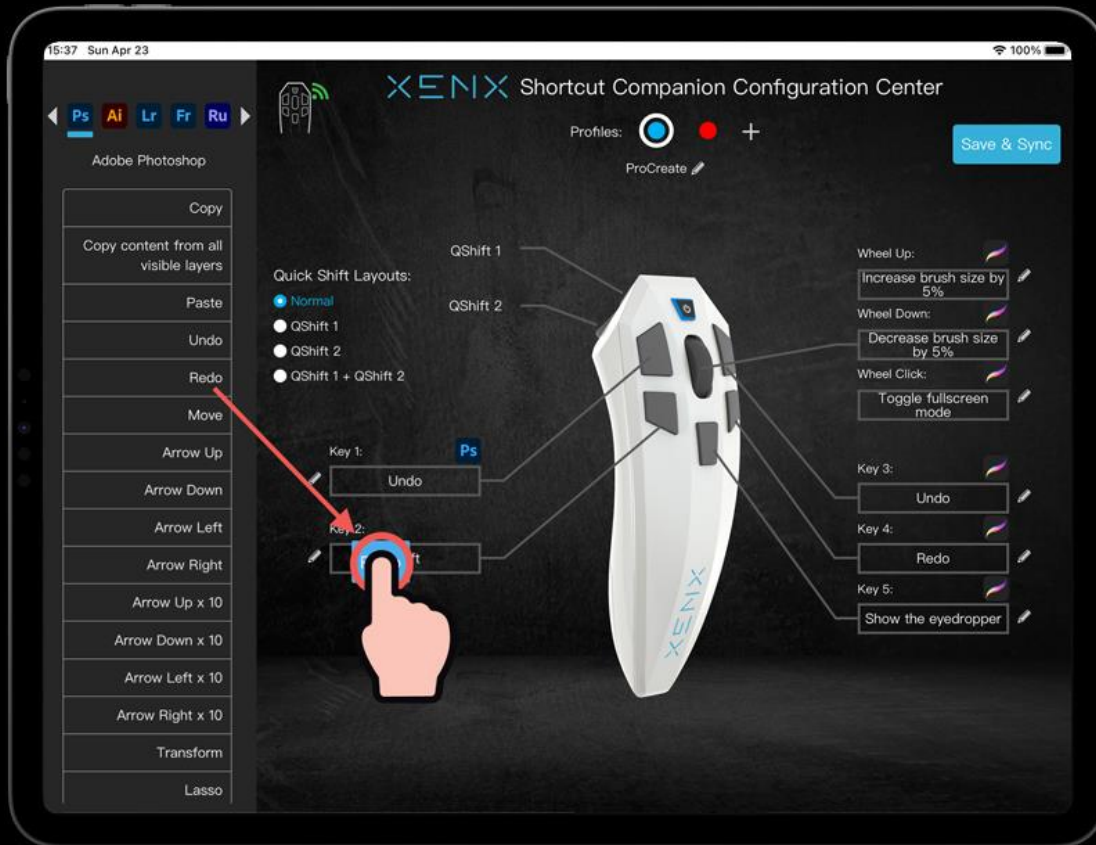

XENX Shortcuts Companion is specially made for Apple iPad® and is compatible with any App that supports keyboard shortcuts. It is fully customizable, allowing you to assign your own specific commands to each button and scroll wheel.

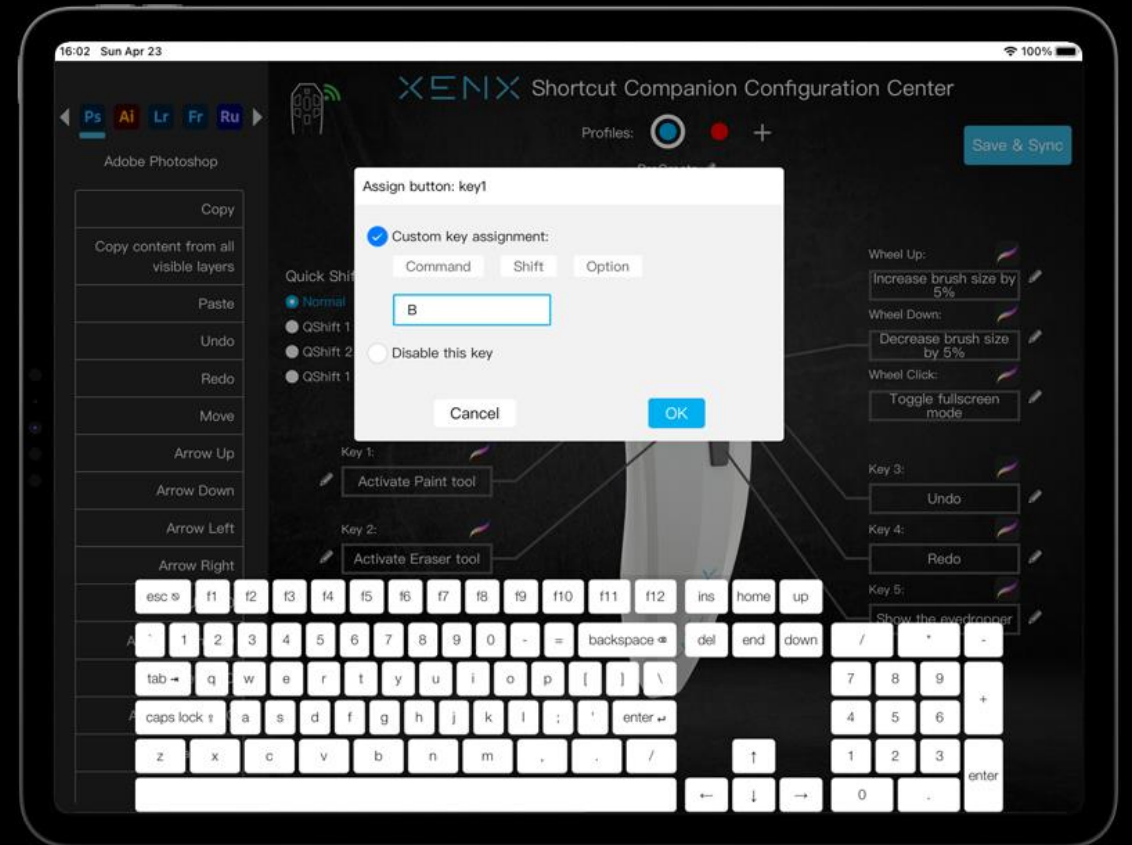

Preloaded Hotkey Lists

User Friendly UI

Our user-friendly and powerful UI makes it easy to configure shortcut buttons for your favorite Apps.

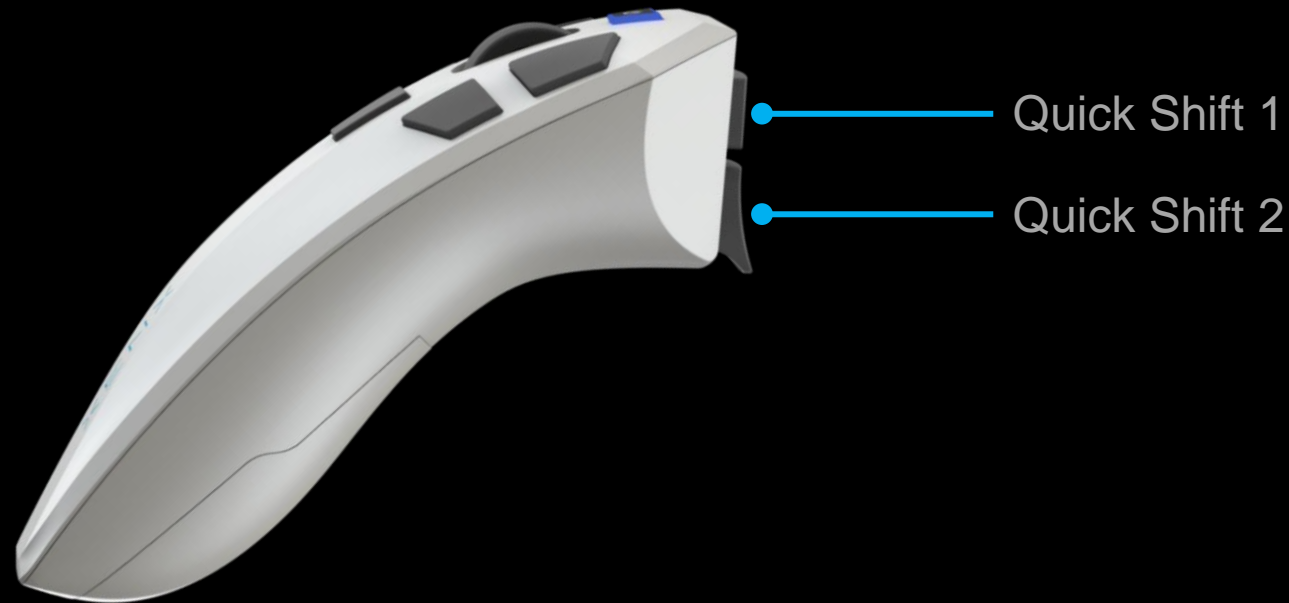

Just drag and drop from the hotkey lists

Or edit your own keyboard hotkey

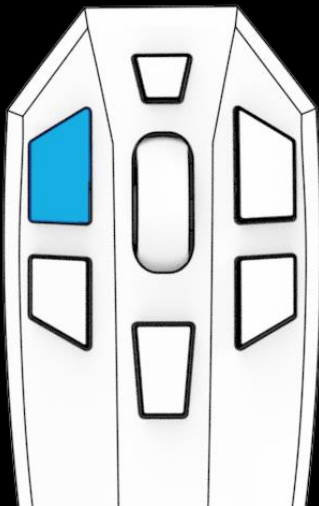

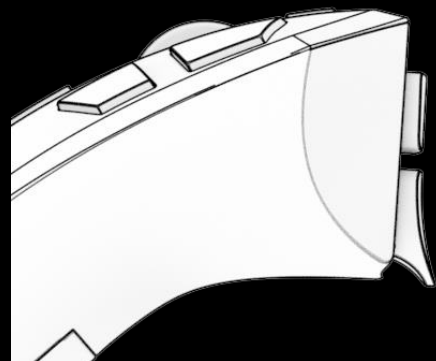

Quick Shift Keys

Introducing the Quick Shift buttons, it allows you to switch shortcut button layouts instantly. By holding down the Quick Shift button, it will change the buttons and wheel functions to another layout. It is like the combination of Shift key on your keyboard.

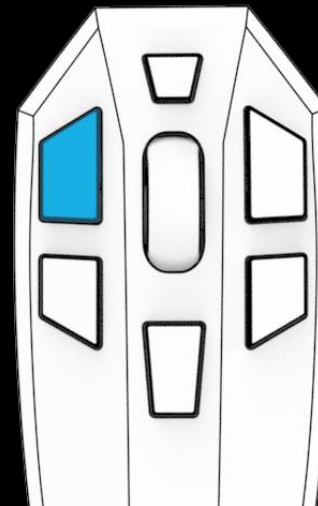

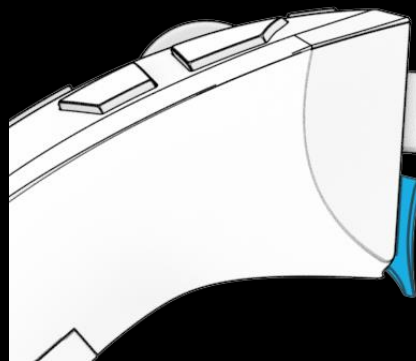

Pencil tool

No Quick Shift key pressed

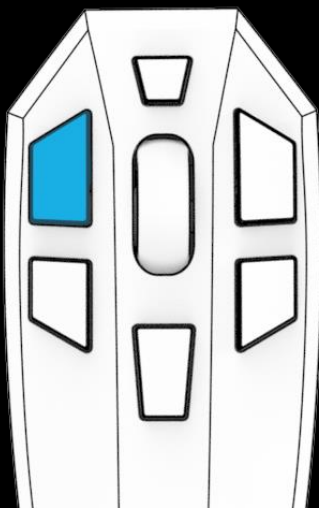

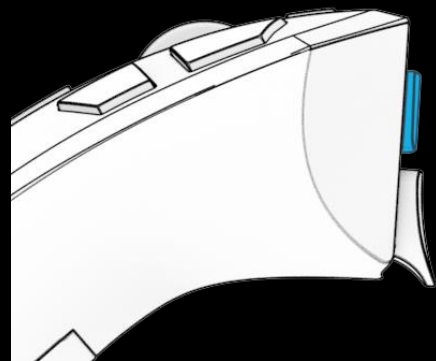

Undo

Quick Shift 2 key pressed

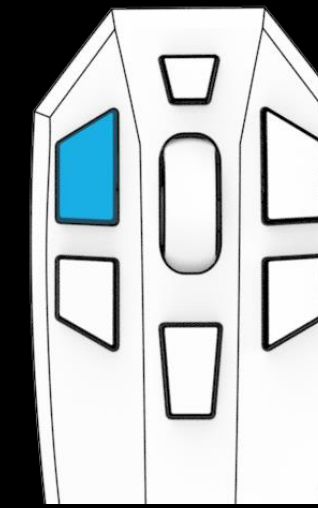

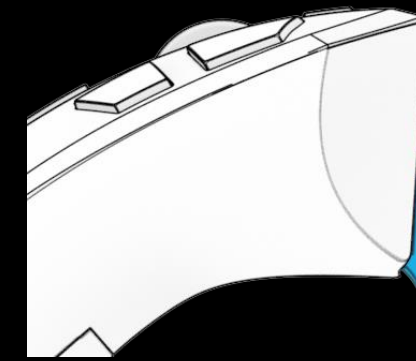

Eyedropper tool

Quick Shift 1 key pressed

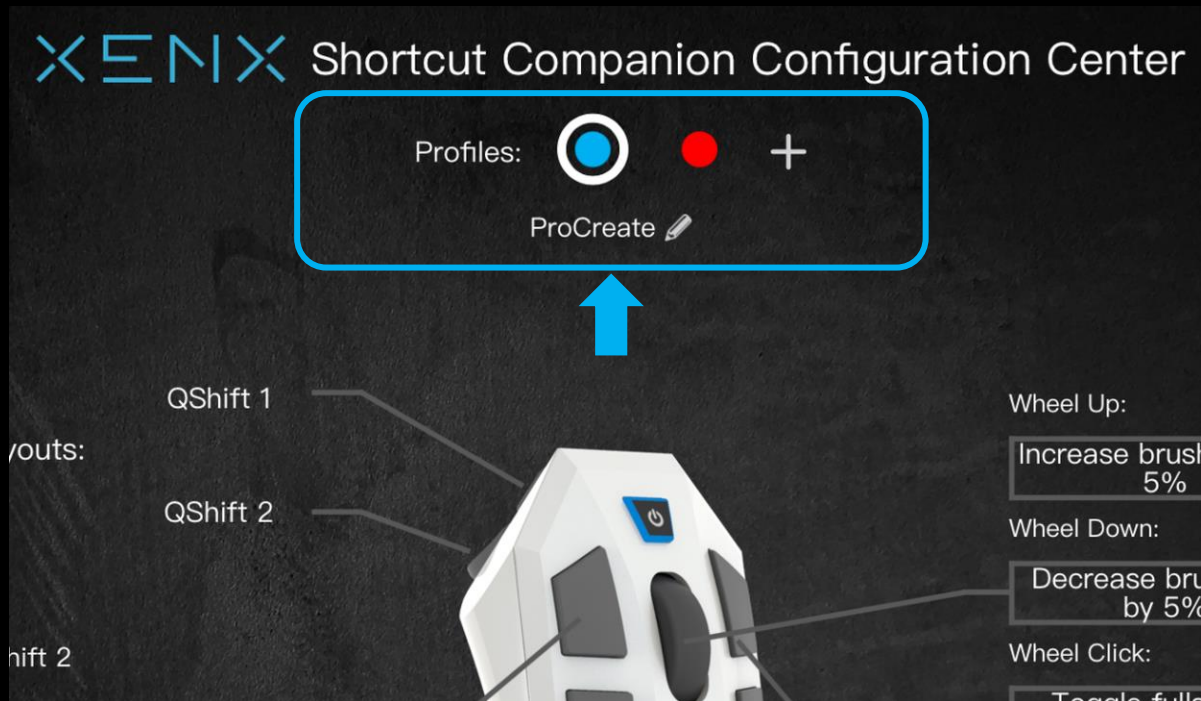

Magic wand tool

Both Quick Shift keys pressed

Up to 4 Different Profiles

To extend its usability, you can customize up to 4 different profiles for different applications or working scenarios.

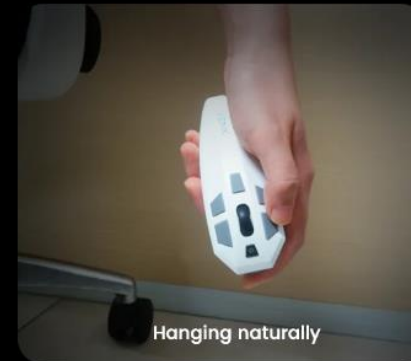

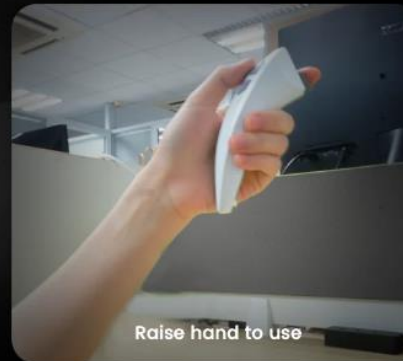

Add profiles

Switch profiles by pressing the power button

Ergonomic Design

XENX Shortcuts Companion has a lightweight, compact design giving you a comfortable and stress-free experience. You can rest your hand at any posture while holding it, reducing the risk of fatigue and discomfort during extended periods of use.

To assign a button from the preloaded shortcut list, just drag and drop the required action to the preferred button.

If you want to assign your own keyboard shortcut, click on the pen icon and key customization windows will pop up.

Select Quick Shift layouts to configure different hotkeys with the combinations when holding the Quick Shift button(s).

You can add a new profile for another application. Click the “+” icon on the Profiles section. Select the corresponding color and enter a name for this profile.

Lastly, remember to press "Save & Sync" to save the settings into Xenx controller.

How to setup your own
shortcut keys

If your favorite app is not on the preloaded app list, you can setup your own shortcut keys.

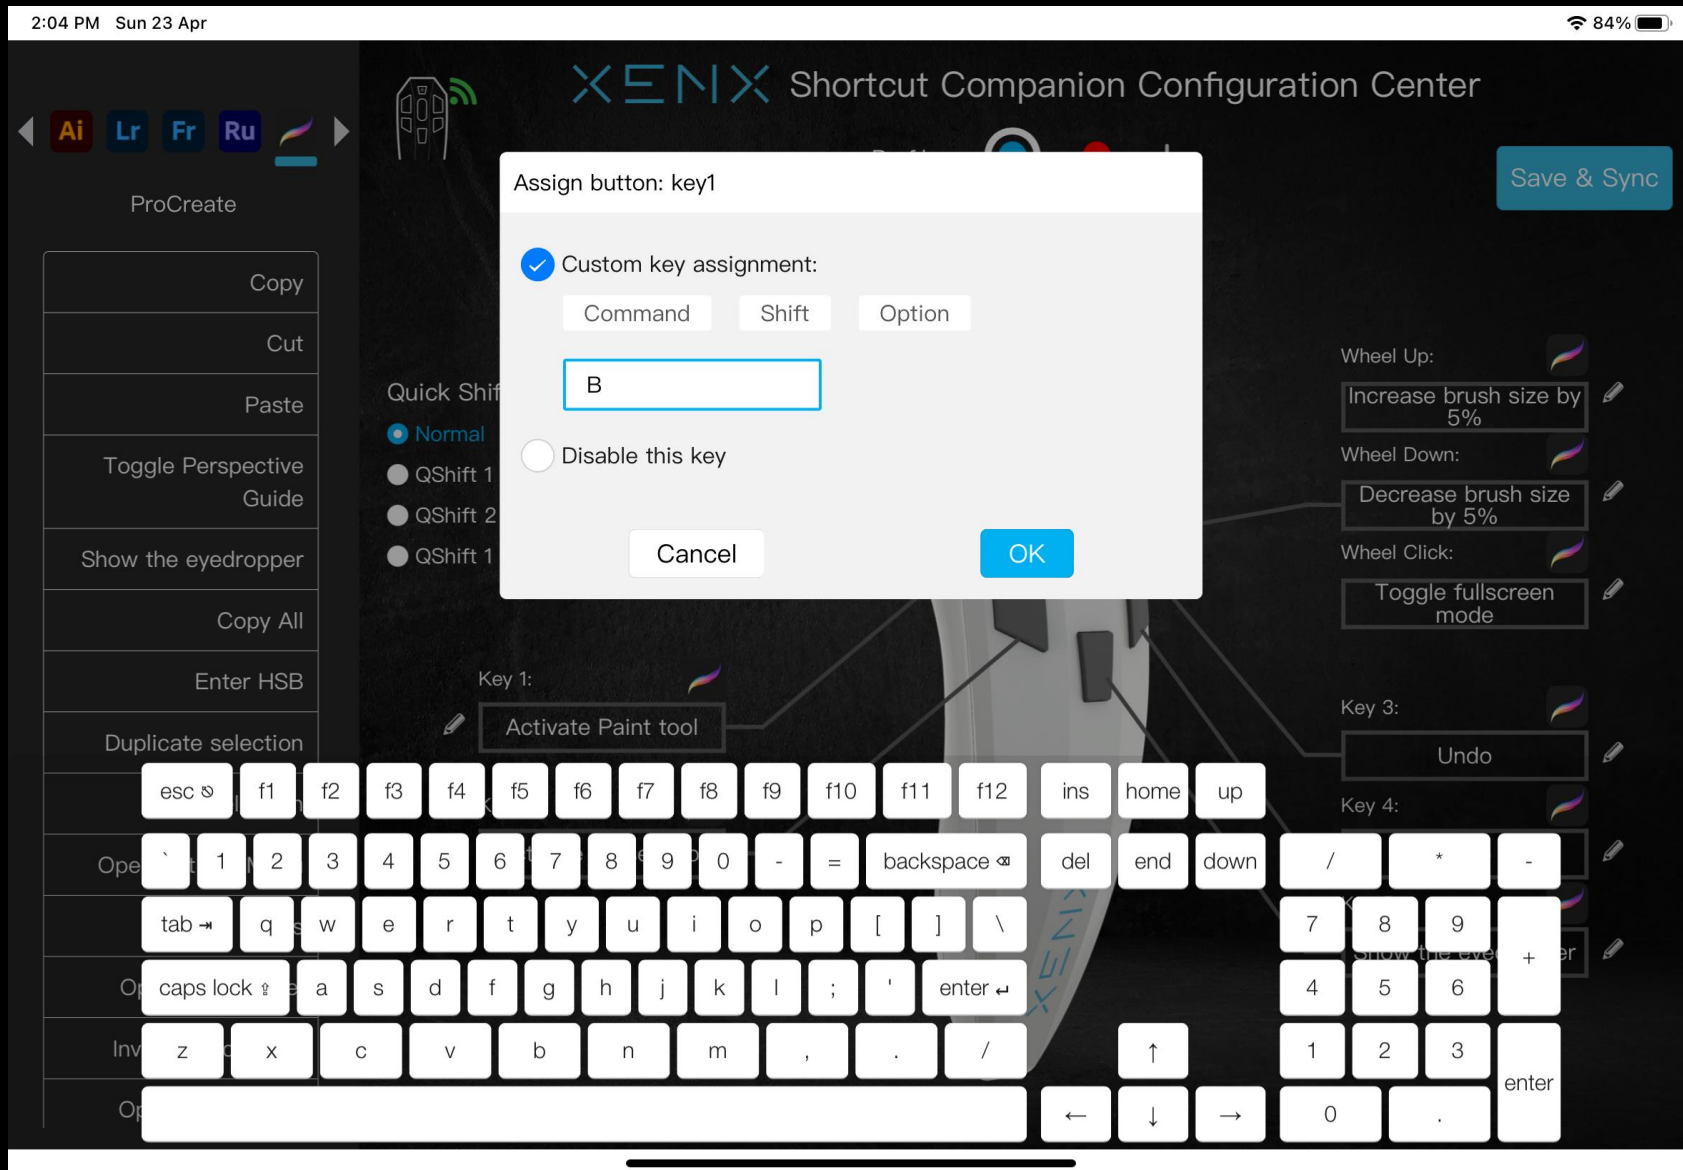

* XENX SC only compatible with app that supports keyboard shortcut keys.

First press the “pen” icon besides the key you want to customize.

Key customization windows will pop up.

Key customization windows will pop up.

Select the combination of
Command, Shift and Option keys

Assign the keystroke in this
key box. When you touch this
box, virtual keyboard will
pop up for you.

Assign button: key1

☒ Custom key assignment:

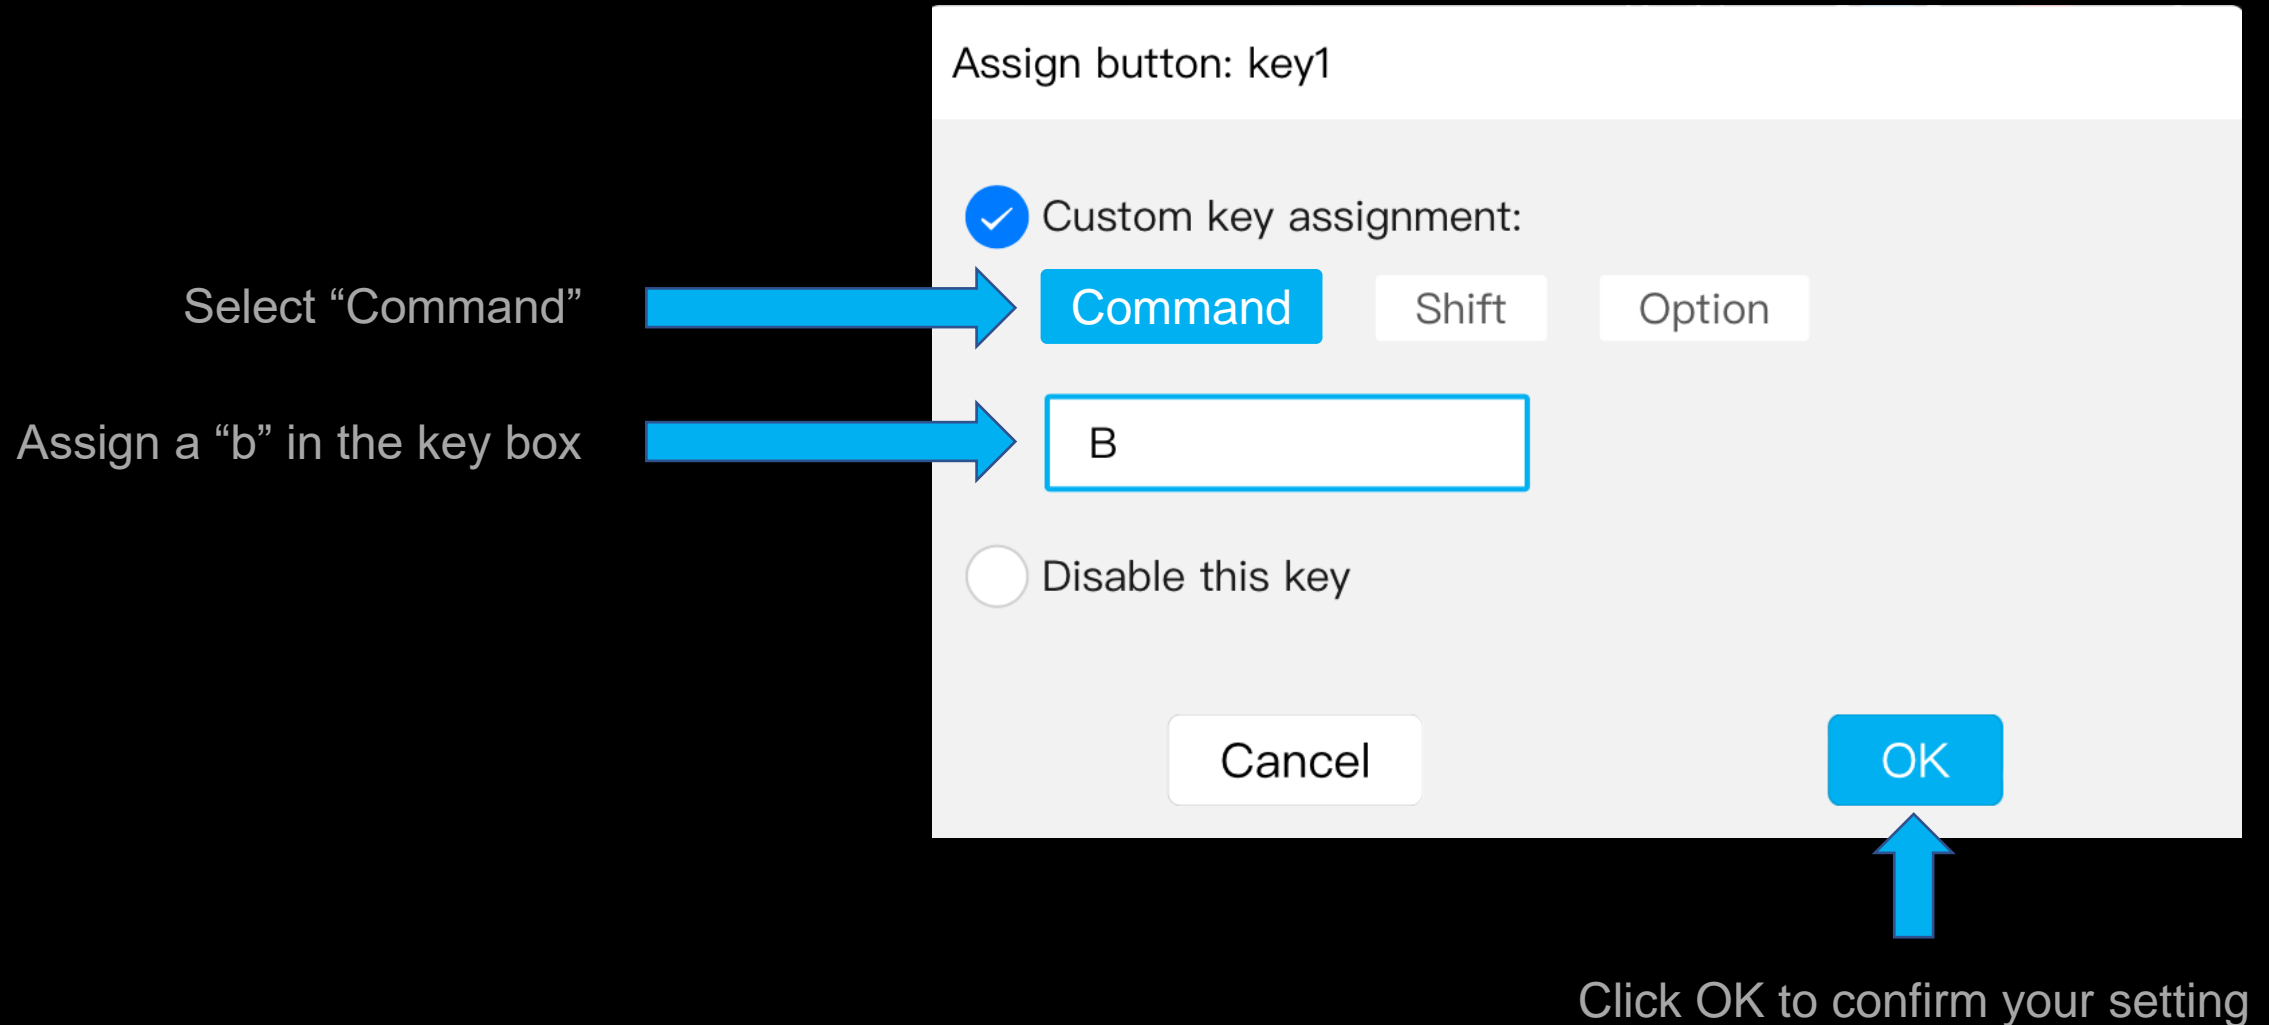

Command Shift Option

B

☐ Disable this key

Cancel OK

For example, to setup a “Color Adjustments” shortcut for Infinite Painter.
The keyboard shortcut for this action is “Command + B”.

Lastly, remember to press “Save & Sync” to save the settings into Xenx controller.
