To whom it may concern:

Based on its independent and collective critical scientific evaluation of the available information on ConcenTrace® presented in the dossier prepared by AIBMR Life Sciences for the purpose of a GRAS Self-affirmation determination, the Expert Panel concludes that ConcenTrace®, produced in accordance with current Good Manufacturing Practice, and meeting the specifications presented in the dossier that is the basis for the GRAS determination, is safe for its intended use when the acceptable daily intake of 5 mL is not exceeded. The Expert Panel further concludes that this use is GRAS based on scientific procedures and corroborated by a history of safe use (exposure). The Expert Panel also believes that other qualified experts (qualified by training and/or experience to evaluate the safety of food ingredients) would concur with this GRAS conclusion.

The expert panel consisted of two former FDA and EPA toxicologists: Dr. Ted Farber, PhD DABT (panel chair) and Dr. Judy Hauswirth, PhD (panel co-chair), as well as Dr. John R. Endres, ND (Chief Scientific Officer, AIBMR Life Sciences), Dr. Amy Clewell, ND (Senior Research Associate, AIBMR Life Sciences) and Matthew Barnes, MS (Research Associate, AIBMR Life Sciences).

Sincerely,

A handwritten signature in black ink that reads "John R. Endres". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

John R. Endres, ND
Chief Scientific Officer
