

Gauge Graphics - GI-VETS-01

Gauge Innovations gauges can display a customer supplied graphic when the gauge is powered up.

Typically, the graphic will be a photo of the customer's vehicle or a logo designed by the vehicle owner.

Please note the following information regarding the operation of the gauge graphic and the requirements when submitting a graphic to Gauge Innovations.

1. The gauge graphic will display for 10 seconds when the gauge is powered up. A longer or shorter display period can be set if you prefer. Typically, a graphic will load and begin to display about 2-3 seconds after the gauge is powered up.
2. The graphic submitted for display must meet the following requirements:
 - Full colour jpg file
 - The graphic format must be square and exactly 128 x 128 pixels.
3. Gauge Innovations expects the customer to have observed any copyright requirements regarding the graphic. Of course, Gauge Innovations will not reuse a customer's graphic for any other purpose not authorised by the customer.
4. Gauge Innovations can help where a customer needs assistance converting a photo or logo to the required format.
