

SYMBIOPAWS™ — CONCENTRATED GUT & IMMUNE HEALTH SUPPORT FOR DOGS AND CATS

WHAT IS SYMBIOPAWS?

SymbioPaws™ is a natural blend of probiotics, prebiotics, and digestive enzymes, designed to support gut health, digestion, and immune function in dogs and cats.

It is perfect for everyday wellness, digestive upsets, recovery after stress, and supporting senior pets in living their best, most vibrant lives.

KEY BENEFITS

SymbioPaws™ Helps To:

- Support a healthy gut microbiome
- Aid nutrient absorption
- Promote digestive comfort
- Strengthen natural immunity
- Boost vitality in senior pets

AT THE HEART OF IT

At the heart of SymbioPaws™ are carefully selected probiotic strains, digestive enzymes, and natural prebiotics - working together to help your pet feel young at heart, one happy belly at a time!

WHAT'S INSIDE

We've included nine powerful probiotics, each chosen to support optimal gut and immune health:

Bacillus coagulans A hardy probiotic that supports gut comfort, reduces inflammation, and encourages the growth of beneficial bacteria. (Majeed M. *et al.*, 2016)

Lactobacillus acidophilus One of the most trusted probiotics for soothing sensitive stomachs, improving digestion, and strengthening the gut barrier. (Plaza-Diaz J. *et al.*, 2019)

Saccharomyces boulardii A resilient probiotic yeast that helps control diarrhoea, restore gut balance during stress, and support a healthy intestinal lining. (Kelesidis T. *et al.*, 2012)

Lactobacillus rhamnosus Well-known for enhancing gut barrier function, supporting digestive health, and reducing gastrointestinal upset. (Segers M.E. & Lebeer S., 2014)

Lactobacillus plantarum Supports the production of beneficial compounds in the gut, improves stool quality, and helps regulate immune responses. (Arena M.P. *et al.*, 2018)

Lactobacillus casei Promotes digestion, helps balance gut bacteria, and supports healthy immune system responses. (Tsai Y.T. *et al.*, 2019)

Bifidobacterium longum A gut-health superstar that soothes inflammation, improves digestion, and supports mental wellness through the gut-brain axis. (O'Callaghan A. & van Sinderen D., 2016)

Bifidobacterium breve

Helps reduce gut inflammation, promotes healthy bowel movements, and supports overall digestive wellness. (Turroni F. et al., 2014)

Bacillus subtilis Known for its ability to survive harsh stomach conditions, promote digestive enzyme production, and support gut flora balance. (Elshaghabe F.M.F. et al., 2017)

WHY IT'S GREAT FOR SENIOR DOGS AND CATS

As our pets age, their digestion, gut health, and immune strength naturally start to decline.

Research shows that:

- Gut microbiome diversity drops in older animals, making them more prone to digestive upsets, inflammation, and infections. (Snoeck et al., 2004, The Journal of Nutrition)
- Digestive enzyme production slows down with age, meaning older pets can struggle to properly absorb the nutrients they need for energy, healing, and vitality. (Zhao et al., 2019, Aging and Disease)
- Probiotic supplementation has been shown to improve gut health, immune markers, and overall quality of life in aging animals. (Benyacoub et al., 2003, Journal of Nutrition)

SUGGESTED USE

Sprinkle over food once daily.

(Refer to label for dosage based on body weight.)

HOW SYMBIOPAWS™ HELPS

Helps to restore gut balance: Our carefully selected probiotics help replenish beneficial bacteria, restoring a healthier gut microbiome and improving digestion.

Boosts nutrient absorption: By supporting enzyme production and maintaining gut integrity, SymbioPaws helps older pets get more from their food, meaning more energy for play and cuddles!

Strengthens immune defences: A healthier gut leads to a stronger immune system, helping ageing pets fend off infections and inflammation more effectively.

Reduces inflammation naturally: Certain probiotics in SymbioPaws produce anti-inflammatory compounds that soothe the gut and calm overactive immune responses.

Enhances comfort and vitality: Better digestion and stronger immunity mean less tummy trouble, more regular poops (yay!), shinier coats, brighter eyes, and an overall zest for life.

WARNINGS AND PRECAUTIONS

- SymbioPaws™ is formulated for dogs and cats.
- If your pet has a compromised immune system, a serious illness, or is undergoing chemotherapy, please consult your veterinarian before introducing new probiotics.
- For pets with sensitive stomachs, start with a lower dose and gradually increase as tolerated.

SymbioPaws™ is not intended to diagnose, treat, or cure any specific disease. Always consult your vet for persistent health concerns, and discontinue use if any adverse reactions occur.

GUT HEALTH, DIGESTION, AND IMMUNE
SUPPORT — NATURALLY.
