

Flex Metal Gel Coats

JESMONITE
MADE FROM
TE[®]

About Flex Metal Gel Coats

Jesmonite Flex Metal Gel Coats are formulated using real metal powder to create the ultimate replication of metal in moulded materials. The Jesmonite Flex Metal Gel Coat surface can be polished with fine grades of wire wool and polishing machinery to reveal the metallic powders.

Jesmonite Flex Metal Gel Coats are available in Bronze, Copper, Silver Bronze and Brass. They are fully compatible with Jesmonite AC730 and Jesmonite AC830 as a laminated or cast back up.

Jesmonite Flex Metal Gel Coats achieve a B-s1-d0 EN13501-1 Fire Classification.

Flex Metal Gel Coats Applications

Jesmonite Flex Metal Gel Coats are designed for glass reinforced decorative applications, when used in conjunction with Jesmonite AC730 as a backup material. They can also be used for heavyweight cast applications, when used in conjunction with Jesmonite AC830 as a backup material.

Flex Metal Gel Coats Key Benefits

Stronger

Strong, flexible, and more durable, with an increased impact resistance.

Lighter

Lighter than stone, concrete and traditional sand and cement products.

Safer

Independently fire rated in accordance with European Fire Classification EN 13501-1. Solvent free with no VOC's.

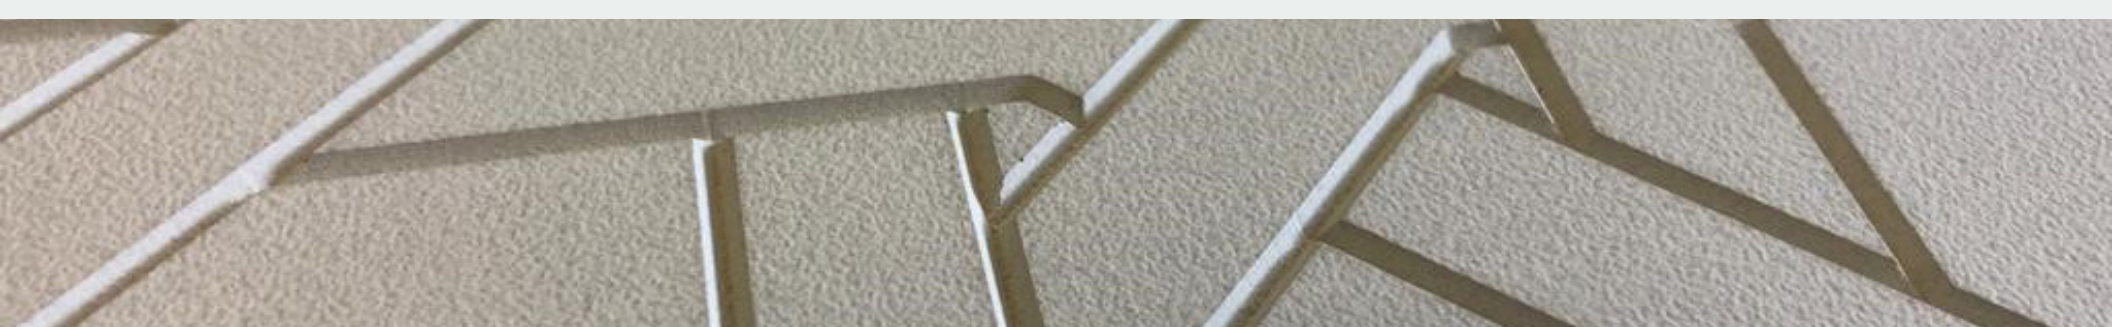

Finer

Replicates the very finest detail with superior weathering qualities.

Greener

Water-based making it kinder to the environment.
