# Ice Away® Rock Salt

## Product Description

- Rock salt obtained by conventional mining methods, crushed and screened to size.
- A proven performer, IceAway economically clears sidewalks of snow and ice winter weather. Its crystals are optimally sized for melting performance.
- Melts ice and snow down to 5°F/-15°C.

## Physical Properties

Bulk Density - 72 lbs/ft

Typical and specifications are based on the previous year's historical data:

### Chemical Analysis

Constituent			Typical	Min / Max
Sodium Chloride	NaCl	(%)	97	95.0 - 100

### Typical Screen Data

U.S.S. Mesh	Tyler Mesh	Open (Inches)	Typical Retained %	Min/Max
0.375	0.371	0.375	0.75	0 - 3
4	4	0.187	28.81	19 - 37
8	8	0.0937	57.54	18 - 30
14	12	0.0555	76.87	71 - 83
30	28	0.0234	88.19	85 - 100
Pan	Pan			100 Max

## Method of Analysis

American Society for Testing and Materials Procedure E534. All other testing is from Compass Minerals' internal quality control procedures.

### Packaging

### Palletization

# ICE AWAY ROCK SALT

## Chemical Composition:

SODIUM CHLORIDE

**Effective to:** 5°F

**Color:** White

**Bag:** 25lbs or 50lbs

**Shipping:** 49 bags per pallet, 18  
pallets per truckload

The economical choice, Ice Away Rock Salt is made of chunky halite crystals that work quickly and efficiently. Due to the medium-sized crystals, you get both the ice and snow melting qualities of natural salt with the much-needed traction of a larger particle.

Halite, otherwise known as rock salt, is a conventionally mined-material that is sifted to ensure that what you get are consistently-sized crystals that will cut right into snow and ice while providing plenty of traction. Halite is suitable for pretty much all circumstances when snow and ice melt are a concern.
