

# Liquitint™ Winter

Advanced colorants for snow & ice management

A unique technology for household and industrial applications.

Liquid colorants provide brand identity and spray pattern indication without compromising the performance or safety of your salt formula. Loadings of around 0.005% to 0.5% of colorant to salt or brine solutions are common.

## Liquitint Winter Colorants

- Stable and compatible with liquid and solid de-icing formulas.
- Recognized and used by DOT nationally.
- Homogeneous liquids that allow ease of handling and dispersment.
- Non-staining and non-ionic. Creates limited opportunity for skin exposure.
- Water soluble - decreasing the persistence of color in the environment.
- No negative environmental impact when used as directed.
- Does not contain and is not manufactured with heavy metals.
- Formulations containing Liquitint colorants have been approved by Safer Choice and other environmental agencies.
- Vivid colors available in any shade.
