BLENDED with CALCIUM CHLORIDE

Effective to: -5°F

Color: *Purple*

Bag: *50lbs*

Shipping: *49 bags per pallet, 18 pallets per truckload*

Sometimes less is more. Pro Purple, like its blue companion, is highly-colored to ensure you know exactly how much you're using and where it's landing. Pro Purple is referred to as our "mid-grade" product.

"Mid-grade" doesn't compromise the efficacy of this mix of rock salt and calcium chloride. The primary difference is its effective temperature, which is -5F and above.
