

NANNIC

SKIN CARE BY SCIENCE

NBE

NANNIC BEAUTIFYING ENERGY

VISIBLE AND LONG-LASTING EFFECTS FROM THE VERY FIRST TREATMENT

NBE RF

DEEP SKIN

- ★ Scientifically supported concept for the improvement, firming and rejuvenation of the skin.
- ★ The NBE-treatments guarantee immediately visible and long-lasting results.
- ★ The NANNIC NBE-concept is applied worldwide by renowned beauty-specialists and skin therapists.
- ★ The NBE-treatments are suitable for each skin type. In combination with continued home treatments the results can be preserved for a very long time. NANNIC NBE stimulates the production of collagen and elastin and also improves the connective tissue, which makes long-lasting skin rejuvenation possible.
- ★ The award-winning NANNIC skin care concept is designed so you can continue your professional treatments with home-products: along with the NBE-concept they form a solution for each skin type and skin problem.

NANNIC BEAUTIFYING ENERGY

SCIENTIFICALLY DEVELOPED CONCEPT TO IMPROVE, FIRM AND REJUVENATE THE SKIN WITH IMMEDIATE AND LONG LASTING EFFECTS.

Is there a safe and painless treatment that will make skin smooth, youthful and firm while also firming up the jaw line?

It may sound unattainable, but with the development of the NANNIC PROF NBE, NANNIC has made a revolutionary breakthrough in combatting the signs of ageing skin.

How does NANNIC PROF NBE work?

NANNIC PROF NBE combines electromagnetic energy with proven effective active ingredients containing cell-identical elements.

How does it infuse the active ingredients into the skin?

NANNIC PROF NBE uses powerful electromagnetic and diathermic energy to carry nutrients deep into the skin. As the electromagnetic energy enters the skin, its diathermic activity stimulates the circulation of oxygen-rich blood to the area. Skin cells absorb energy, which will be gently released again afterwards. The drainage of cellular waste is also stimulated.

The transfer of energy is calculated by the semiconductivity of both the insulated NANNIC PROF NBE RF probe and the professional NANNIC serums. Electromagnetic energy optimises cells through polarisation. Di-electric discharge releases warmth into surrounding tissue, raising skin temperature by 1.5° to 2°C, which sets a range of physiological processes in motion. Cells act as condensers, storing the alternating energy in the form of bio-energy.

An intensive course of treatment gives long-lasting results. The production of collagen, elastin proteoglycans are stimulated, which combined with the improvement of the connective tissue results in a lasting, more youthful appearance.

NANNIC PROF NBE RF

A BREAKTHROUGH IN THE FIGHT AGAINST SKIN AGEING

The NANNIC NBE RF concept for face and body firms the skin and visibly reduces signs of skin ageing. NANNIC NBE treatments are applied by certified, trained beauticians.

What does the NANNIC NBE RF concept mean for your skin?

Enhancement of the natural processes of the cells • Stimulation of cell division • Increased moisture retention of the skin • Improved circulation of oxygen-rich blood • Increased absorption of active ingredients • Improved structure in connective tissue • Better tone in underlying muscles • Smaller pores • Improvement of contours • Production of collagen and proteoglycans is stimulated • Drainage of the lymph system • Reduction of free radicals

NBE (NANNIC Beautifying Energy) treatments are suitable for all skin types.

FACE:

- Strengthen and firms the skin
- Reduces wrinkles
- Accentuates contours
- Instant lifting effect
- Improves the connective tissue
- Stimulates the production of collagen and elastin
- Reduces eye bags
- Reduces dark circles
- Reduces double chin
- Decreases acne, couperosis and hyperpigmentation

BODY:

- Reduces fat
- Reduces striae and scars
- Reduces cellulite
- Firms the skin
- Reduces free radicals
- Improves blood circulation

STRESS MANAGEMENT:

- Deep tissue massage
- Lymphatic drainage

NANNIC NBE DEVICES

NBE 1000

NBE 1000 with 1 treatment circuit.

a) Monopolar application:

Quick results over large areas. For manual face and body treatments.

b) Bipolar application:

Ideal for thin and sensitive skin, such as around the eyes, on spots of couperosis or around implants and injectables.

TYPE	NBE 1000	
REF.	NBE-100.05	
Polarization	Bipolar + Monopolar	
Frequency	1 MHZ	1 MHZ
Energy	120 W + 120 W

NANNIC NBE DEVICES

NBE 3000

The NANNIC NBE 3000 is a device in which 3 different circuits can be used simultaneously:

- Monopolar and bipolar operating together; or
- Automatic plate electrodes can be combined with active manual electrodes.

Quicker results when multiple body treatment zones and functions are combined.

a) Automatic active and passive plate electrodes:

- Used to stimulate automatic lymph drainage during e.g. a facial or body treatment.
- Can be used to warm tissue and start the lipolysis before e.g. a monopolar body treatment (fat reduction, cellulite, ...).

b) Monopolar application:

Possibility to work with 2 probes simultaneously to improve application time and result efficiency.

c) Bipolar application:

Ideal for skin that is very thin and sensitive, such as around the eyes, on spots of couperosis or around implants and injectables.

NANNIC

NBE ACTIVE SERUMS

BIO ACTIVE FORMULA

medically proven active ingredients - dermatologically tested

NANNIC NBE **LIFTING** 100 ml • 150 ml

NBE Lifting stimulates the formation of new collagen, elastin and glucosaminoglycans. Also helps to define the contours of the face, firms sagging skin, strengthens the jaw line, equilibrates the moisture balance of the skin, reduces fine lines and wrinkles and provides an instant lifting effect.

NANNIC NBE **COUPEROSE** 100 ml

NBE Couperose repairs the cellular matrix (a type of network in which veins are embedded) which visibly reduces and repairs couperosis and redness. It is anti-inflammatory, protects the Fibroblast β growth factor and increases the synthesis of collagen, elastin and endogenous glycosaminoglycans. NBE Couperose also works extremely well on dark circles and bags under the eyes.

NANNIC NBE **FLACCID SKIN** 100 ml • 150 ml

NBE Flaccid skin tightens the skin by stimulating cell renewal, stimulating the formation of collagen and elastin and improving the skin's moisture balance. It is a powerful anti-oxidant for hydrophilic and lipophilic targets.

NANNIC NBE **CELLULITE** 150 ml

NBE Cellulite reduces the number of mast cells, as well as the secretion of granules from the mast cells. It activates the lipolysis and improves membrane function (in fat cells). On top of that, it is a strong anti-oxidant that improves the metabolism and acts as an anti-inflammatory. NBE Cellulite serum gives spectacular results over a short period.

NANNIC NBE **FAT REDUCTION** 150 ml

NBE Fat Reduction stimulates the natural lipolysis and converts fat into energy, which means the fat is burnt, just like during intensive sports practice. This counteracts the formation of new fat in the fat cells. NBE Fat reduction has a powerful detox effect and it strengthens the connective tissue.

NANNIC NBE **STRIAE** 100 ml

NBE Striae greatly increases the production of collagen in the skin, improves elasticity, improves connective tissue and stimulates cicatrisation. Very effective on deep wrinkles. It also works as a preventive treatment.

NANNIC NBE **IMPURE SKIN** 100 ml

NBE Impure Skin repairs the connective tissue (elastin & collagen), prevents the formation of scars, normalizes the bacterial flora, regulates sebum secretion, gently cleans deep into the pores and prevents the formation of permanent scar tissue.

NANNIC NBE **HYPERPIGMENTATION** 100 ml

NBE Hyperpigmentation slows down the command that activates the pigment cell, reduces tyrosinase activity in the cell, slows down the distribution of melanosomes to the keratinocytes and drastically reduces free radicals and ROS (reactive oxidative species). NBE Hyperpigmentation has a normalising effect on age spots, post-inflammatory hyperpigmentation and melasma.

NANNIC NBE **BASE** 150 ml

NBE Base, a deeply moisturizing lamellar base which regulates the protective skin barrier and prevents TEWL (trans epidermal water loss).

All NANNIC NBE treatment serums are suitable for all skin types and can be combined to optimize results for various skin problems.

NANNIC NBE **PROBIOTIC ACTIVATOR** 10 x 1 ml

NBE Probiotic Activator fluid enriched with lysate of probiotic bifidobacteria, a biotechnological active substance which specifically supports the skin's own protection and repair mechanism thus counteracting premature skin aging. NBE Probiotic Activator improves the energy transfer of the NBE RF device as well as the sliding effect of the NBE RF probes. NBE Probiotic Activator exponentially improves the quality of the treatment and enhances the quality and result of the NBE treatment.

NANNIC **HEPTA-PEPTIDE MASSAGE COMPLEX WITH ARNICA** • 300ml

An innovative massage complex that provides a soft and almost endless gliding while the added active ingredients improve and rejuvenate the skin.

This unique formula was constructed with a patented cyclical lipopeptide containing no less than 7 different amino-acids. This complex with strong anti-ageing and skin-soothing properties strengthens the skin barrier, restores the moisture balance, improves elasticity, supports cellular regeneration and suppresses redness and irritation. The formula contains arnica oil, cannabis serum, caprylic/capric triglycerides, safflower oil, grape seed oil, hemisqualane and squalane.

NANNIC **WHITE WILLOW BARK PEELING MASK** 500ml

A mild keratolytic skin peel which prepares the surface of the skin for a NANNIC NBE treatment. As well as an exfoliating effect, it also reduces free radicals and works well on acne.

NANNIC NBE **TOOL CLEANER** • 250 ml

A lotion which was initially used as a disinfectant for skin wounds. This lotion cleans and disinfects the equipment used in a salon. The NANNIC Tool Cleanser does not contain any abrasive substances but in addition to thorough microbial cleaning, it offers protection for NBE hand-pieces and covers. In the salon, the tool cleaner can also be used to clean worktops, seats and instruments, etc...

NANNIC **PEEL OFF ALGAE MASK**

A specially developed peel off algae mask containing alginate enriched with active substances. The active ingredients contained in the masks close the pores, refresh the surface of the skin and give the customer an immediate feeling of calm and relaxation. They are naturally bio-organic and do not contain any preservatives.

NANNIC **PEEL OFF ALGAE MASK ANTI-AGEING WITH 'SPIRULINA'** 500 g

Promotes cellular regeneration, strengthens the connective tissue, improves elasticity and has a strong anti-oxidative effect. Aside from alginates, this mask contains 'spirulina'. This singular celled blue-green micro-algae is considered the most nutritious algae, extremely rich in proteins, carbohydrates, vitamins and minerals.

NANNIC **PEEL OFF ALGAE MASK ANTI-WRINKLE** 40 g • 500 g

Contains hexapeptide which mitigates the contractions of the facial muscles so that wrinkles fade. Improves collagen synthesis, is rich in potassium and magnesium, intercepts and neutralizes free radicals and markedly improves the moisture balance, even from the very first application.

NANNIC **CHARCOAL MASK** 500 g

This detoxifying peel off mask is made with the highest quality alginate (guluronic acid) and charcoal. Thanks to its porous structure, charcoal deeply purifies the skin by absorbing the toxins and impurities into its cavities. It regulates sebum secretion and is ideal for stressed skin suffering from pollution. Charcoal has anti-oxidant properties and helps fight free radicals which are responsible for skin-ageing. It can be used for all skin types, and is especially recommended for mixed to oily, impure and stressed skin.

NANNIC **PEEL OFF ALGAE MASK ANTI-STRESS** 40 g • 500 g

A certified bio-mask that effectively reduces free radicals. Smooths, relieves tension and relaxes the skin. Protects epidermal cells from oxidative stress. Reduces glycation of the dermal proteins and reduces UV damage.

NANNIC **PEEL OFF ALGAE MASK ANTI-POLLUTION WITH VITAMIN C** 500 g

This anti-pollution mask with organic apple extract contains vitamin C which restores glow to the skin. Apple polyphenols are currently considered to be the most efficient ingredients to combat free radicals. They reinforce microcirculation, protect elastin and collagen fibres and prevent the hyaluronic acid from being destroyed.

NANNIC PROF NBE DEEP SKIN

THE NEW GENERATION MICRO-CHANNELLING

NBE Deep skin is a revolutionary device with 3 unique tools: Ablator, Infuser and Corrector. The Ablator does a deep cleansing of the skin to remove dead skin cells. This ensures further skin treatments to work more effectively. The deep abrasion of the Ablator stimulates the skin's natural defence mechanisms: the skin regenerates faster, wrinkles fade and the skin image looks more refined. The Infuser and Corrector provide the epidermis with micro-channels without damaging it which allows the specially developed serums to penetrate deep into the skin. This promotes the growth of new cells and slows the ageing of the skin, resulting in a long-term improvement of the skin.

Activating the self-healing powers of the skin results in active, visible and longterm skin rejuvenation and skin improvement.

SKIN REJUVENATION:

- Reduces wrinkles
- Improves elasticity
- Stimulates collagen and elastin
- Restores the moisture balance
- Stimulates cell growth

SKIN IMPROVEMENT:

- Refines pores
- Equalizes the skin
- Refreshes the skin tone

WORKS EFFECTIVELY ON:

- Impure skin
- Acne and acne scars
- Pigmentation
- Couperose
- Striae

A safe triple concept with exceptional results to actively rejuvenate and improve skin. NANNIC NBE Deep Skin combines a new generation mechanical dermabrasion with a revolutionary infusion concept. This innovative, specially developed micro-channelling technology does not damage the skin and provides long-lasting effects from the very first treatment.

3 UNIQUE TOOLS

NANNIC NBE DEEP SKIN provides exceptional long-lasting results in the following treatments:

- Reducing wrinkles
- Skin refinement
- Treating acne, scars and striae
- Pigmentation and couperosis
- Impure skin
- Stimulation of the self-healing powers of the skin
- Improving the moisture balance and TEWL
- Improving the elasticity of the skin
- Increasing the production of collagen and elastin

NANNIC NBE DS ABLATOR

The NBE DS Ablator;
This mechanical dermabrasion removes dead skin cells and stimulates the skin's own natural defense mechanism.

The NBE DS Ablator employs individually packaged sterile 'coronets'. The layer of epidermal cells is abraded using a rotating movement with a high number of rotations per minute. The stem cells in rest are thus prompted to divide. The skin regenerates more quickly, wrinkles disappear and the skin's image is refined.

**EVEN MORE ASTONISHING RESULTS WHEN
COMBINED WITH NANNIC NBE RF**

NANNIC NBE DS INFUSER

The NBE DS Infuser uses individually packaged sterile 'stimulators'. Almost all cellular commands regarding skin are given in the epidermis. It acts as a 'communicator' between the outside world and our bodies. The infuser rapidly provides the epidermis with microchannels (depending on skintype up to 70.000 per minute).

This allows the active ingredients of the Deep Skin Serums to easily penetrate the skin to the correct depth. The healing process of the skin is activated and various intercellular compounds are released, e.g. sleeping cells are prompted to divide, collagen and elastin production is stimulated ...

With Deep Skin Infuser we focus on the epidermis, which contains all the communicators to rejuvenate the skin in the long term, without damaging it. Respecting the human metabolism is the key here. The effect of the NBE DEEP SKIN INFUSER focusses on the following cells:

- in the epidermis: keratinocytes, melanocytes, basal cells and Langerhans cells.
- in the dermis: papillary and reticular fibroblasts.

The result:

- the epidermis is provided with sufficient moisture so that the body's own enzymes can operate fully.
- in the dermis, the production of collagen, elastin and glucosaminoglycans is increased.

NANNIC NBE DS CORRECTOR

The corrector works on deeper details such as on the forehead, crow's feet, acne scars and wrinkles around the mouth, ...

NANNIC NBE DS SERUMS

BIO ACTIVE FORMULA

medically proven active ingredients - dermatologically tested

We have developed five highly concentrated serums especially for the NANNIC NBE DEEP SKIN INFUSER, which are delivered into the deeper epidermis via these microchannels.

NANNIC DS ANTI-AGEING 100 ml

Protects the natural growth factors. This serum contains a hexapeptide which, just like the botulinum toxin, acts on the nerve impulse which activates the muscle. In addition, tripeptides stimulate the growth of collagen, elastin and glucosaminoglycans. Fine wrinkles disappear and deep wrinkles fade.

NANNIC DS HYALURONIC WRINKLE FILLER 30 ml

NANNIC DS Hyaluronic Wrinkle Filler consists of a lamellar base with a high concentration of encapsulated hyaluronic acid. Encapsulated hyaluronic acid is absorbed into the skin more easily and it only swells once it comes into contact with the body's own fluid, which makes wrinkles fade and disappear.

NANNIC DS HYPERPIGMENTATION 30 ml

Slows down the command that activates the pigment cell, reduces tyrosinase activity in the cell, slows down the distribution of melanosomes to the keratinocytes and drastically reduces free radicals and ROS (reactive oxidative species). NANNIC DS Hyperpigmentation has a normalising effect on age spots, post-inflammatory hyperpigmentation and melasma, without being cytotoxic.

NANNIC DS COUPEROSE 30 ml

Vessel walls suffer a lot under the influence of different stress factors (sun, cold, wind, mechanical stress, etc.) This loosens the extra-cellular matrix, which also weakens the capillaries. As a counter-reaction, new capillaries are formed in order to balance the oxygen supply via the red blood cells. NANNIC DS Couperose protects the extra-cellular matrix and prevents this neovascularization with a rich cocktail of essential active ingredients.

NANNIC DS SCARS 30 ml

Treats connective tissue damage such as scars and stretch marks. NANNIC DS Scars serum contains the amino acid "PROLINE" which is one of the elementary building blocks in the production of healthy connective tissue (collagen, elastin, glucosaminoglycans). Proline helps to heal wounds and counteracts the degeneration of the connective tissue.

NANNIC DS PRE INFUSER LOTION 250 ml

A lotion which deep cleanses the skin, and prevents any inflammation; always apply before use of the DEEP SKIN INFUSER.

NANNIC DS EPISTEMIUM+ 15 ml

The DEEP SKIN ABLATOR scrapes away part of the epidermis, which irritates the skin. NANNIC DS Epistemiium+ contains copper tripeptide (GHK-Cu), which stimulates the healing of wounds and also encourages the synthesis of collagen. NANNIC DS Epistemiium+ works on the epidermal stem cells in the basal layer, which increases tissue regeneration.

NANNIC DS BARRIER CREAM 100 ml

Finish each treatment with NANNIC BARRIER CREAM for well protected skin.

- Stimulates cell division and collagen synthesis
- Calms the skin and reduces redness
- Prevents scar formation
- Has an anti inflammatory effect
- Improves elasticity
- Reduces small and large wrinkles
- Improves skin tone
- Supports the skin's self repair mechanism
- Prevents oxidative stress in tissues.

RESULTS after 1 treatment

Experience the highly successful method of **NANNIC NBE Treatments**.
A safe treatment concept with exceptional results in active skin rejuvenation and skin improvement.

MADE IN BELGIUM

NANNIC International was founded by René Nagels and Tine Janssens. The head quarter is located in Heist-op-den-Berg. Even from the very beginning, NANNIC was a trendsetter in new care applications.

NANNIC is a Belgian 3rd generation family-business, productive in innovative cosmetic solutions for active skin rejuvenation and long term skin improvement.

Due to the constant collaboration with experts and research centres across the globe, NANNIC has developed innovative products with strong USP's. Because of this, we have been able to solidify our status as trendsetting cosmetic company and we have won multiple awards worldwide.
