Monitoring your vehicle batteries is easy with the Ultimate9 BM app and Bluetooth Battery Monitor. Simply install the battery monitor to your battery positive and negative terminals, download the app via the Apple App Store or Google Play by searching Ultimate9 BM, or scanning the QR code on the Battery Monitor label. Turn on the app, and the app will locate and show your battery status.

The Bluetooth Battery Monitor can be installed neatly on top of your battery. The 8mm forked cable lugs allow attachment to the battery terminals without having to remove any bolts, just loosen and slide the fork under the nut/bolt and re-tighten. This ensures there is no requirement to disconnect the battery and reset any radio codes etc.

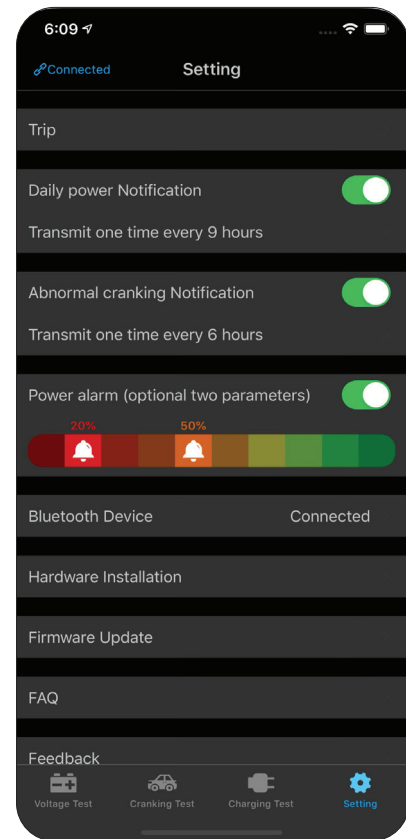

The Ultimate9 BM app is simple to use, and not only monitors battery voltage, but will run cranking and charge tests as well as including a trip function to monitor charging periods while you drive.

The Ultimate9 app can monitor up to 4 batteries and each can be given a custom name, for example; Main, Auxiliary, Caravan, Bike, etc.

Customisation for each battery and how often it is monitored can be accessed via the settings menu.

Also within the menu is the ability to set notification alarms for a particular voltage status of each battery.

The Ultimate9 Bluetooth Battery Monitor is designed to monitor 12V batteries as fitted to cars, SUVs, motorcycles, boats, motor homes, caravans, camper trailers, etc.

It is compatible with lead-acid type batteries including; Flooded, Sealed Lead Acid (SLA), Calcium, Absorbent Glass Mat (AGM), and GEL.

Comprehensive instructions are included and can also be accessed digitally via the settings menu under 'Hardware installation'.

A separate version for Lithium batteries is currently under development.

NEWS RELEASE

Product details:

Name: Ultimate9 Bluetooth Battery Monitor

Price: \$59.95 RRP

Model/Xero identifier: IDBBM20

Barcode: 787099448615

Specifications:

Average Current: 1.5mA

Input Voltage: 6-20V DC

Operating Temperature: -40°C - +90°C

Physical Dimensions: 60mm x 60mm x 20mm

Voltage Accuracy (9-16V): $\pm 0.03V$

Short Circuit Protection: Built-in

Reverse Connection Protection: Built-in

Bluetooth: V 4.0

Bluetooth Name: Battery Monitor

App Keyword: Ultimate BM

Certification: RCM
