The Hidden Sea

We are a premium wine company making wines that matter for the people who care.

Our wines carry a heritage born from the sea. Twenty-six million years ago, South Australia's incredible Limestone Coast was submerged by a vast ocean that was home to a thriving marine ecosystem. We honor our ocean heritage by partnering with ReSea Project, and independently verified ocean plastic waste removal company, and together we're producing the global industry standard for the sustainable removal and cleanup of plastic from the ocean.

Our wine is from Australia's most iconic wine growing regions on the Limestone Coast and produced in our solar-powered winery. We employ some of the best winemakers in the country, we're best-in-class for sustainable agriculture, and all of our wines are vegan friendly. And (if it's important to mention), we've won almost two dozen awards.

We are not creating another drinking moment. We're creating a movement.
