2022+ Ford 6thGen Bronco Front Bumper

1) REMOVE EXISTING BUMPER

Begin removing your vehicle's existing front bumper and sensors. We show how to remove and disassemble your factory bumper over at www.YouTube.com/FishboneOffroad

2) ASSEMBLE

Install your sensors and power harness in the same location as the factory orientation, by tightening down the bracket screws. Secure the harness to the brackets throughout the bumper.

Install any light pods or bars at this time. Note: If your vehicle has Active Cruise Control, installing a light bar will prevent it from working.

3) INSTALL

With a 15mm socket, install the mounting brackets onto the tow hook brackets.

INSTALLATION INSTRUCTIONS

**2022+ Ford 6thGen Bronco
Front Bumper**

With the help of a friend, hold the bumper up to the mounting brackets and with included hardware, secure the bumper to the frame with a 18mm socket and 18mm wrench.

Reconnect your sensor harness.
