1) UNINSTALL FACTORY BUMPER

Remove your vehicle's factory bumper. We show how to do this over at www.YouTube.com/FishboneOffroad.

2) INSTALL SENSORS

Our bumper comes included with dummy sensor plugs. After removing your sensors from your factory bumper, remove the plugs and install your sensors into your new bumper with a 4mm hex key.

3) INSTALL BUMPER

With the help of a friend, hold the bumper up to the frame rails and secure it by reusing your 4 factory bolts and the included M14 bolts with a 18mm socket.

Finally, install your license plate lights and license plate.
