## 22+ 6thGen Ford Bronco Rear Bumper

### 1) UNINSTALL FACTORY BUMPER

Remove your vehicle's factory bumper. We show how to do this over at

[www.YouTube.com/FishboneOffroad](http://www.YouTube.com/FishboneOffroad).

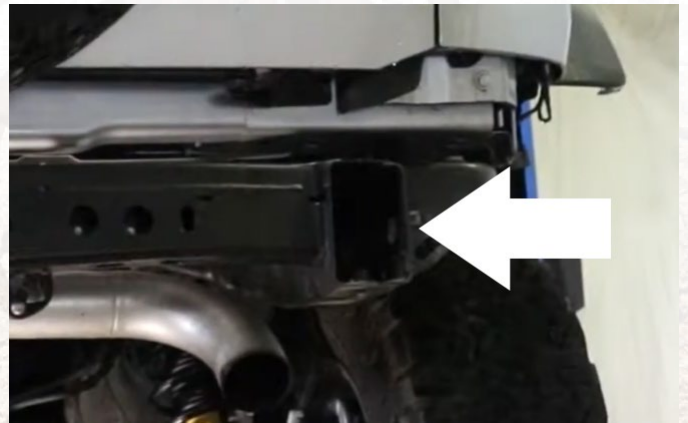

### 2) INSTALL SENSORS

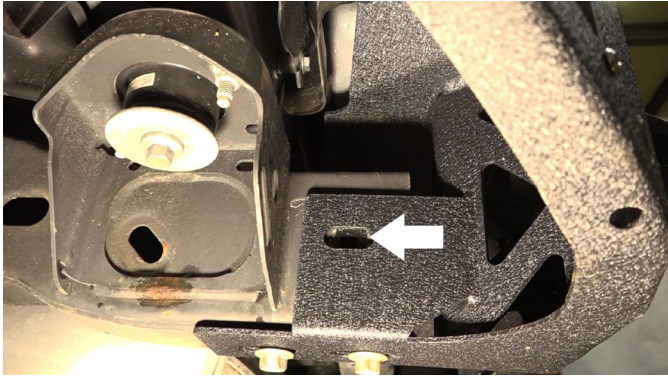

Our bumper comes included with dummy sensor plugs. After removing your sensors from your factory bumper, remove the plugs and install your sensors into your new bumper with a 4mm hex key.

### 3) INSTALL BUMPER

Remove the adhesive from the back of the nutplates and stick it behind the shown hole, on the inside of each frame rail.

With the help of a friend, hold the bumper up to the frame rails and secure it by reusing your 4 factory bolts in the bottom of the rail, and the included M14 bolts into the side nutplates with an 18mm socket.

Finally, install your license plate lights, and license plate with the 4 included button head bolts.
