

Securing the wooden light pulls to your existing cord

Our oak rope light pulls are all crafted in the UK from solid oak and come complete with a length of rope and overhand loop ready to attach to the existing light cord as per the diagram below:

Ceiling Rose

Tie the top of the existing light chord into the rope loop and trim excess (leave enough light chord to attach a ferrule if necessary). The 5mm thick Jute Cord is 2 metres long. Allow pull to hang and adjust height to desired length, re-knot and trim if necessary.
