Precise Power & Control

FLEX-LINK PRO™ has 3 individual channels which can be individually controlled either manually ON/OFF or Scheduled ON/OFF. Each Channel or “Zone” can be programmed via SPJ SMART LIGHTING™ APP to have their own unique schedule or can be overridden manually with a tap of a button on your smartphone.

Because this is a WIFI Enabled system and CLOUD BASED it can be programmed and controlled from anywhere in the world (off job site)! This eliminates annoying “call back” situations when a client wants a simple schedule change or the schedule has been interrupted due to a temporary power outage. Installers can LOGIN from their office and program SPJ SMART LIGHTING™ FLEX-LINK PRO™ with ease.

Smart, yet simple.

FEATURES :

- 3 Channel Independent Zone WIFI Controlled Via SMART PHONE.
- 300 watt total load combined over 3 channels.
- NOT LIMITED TO 100W USAGE PER CHANNEL.
- UL1838 Landscape Transformer.
- 304 Stainless Steel with Locking Hinged Door to prevent vandalism.
- Astronomic Timer scheduling Via SPJ SMART LIGHTING APP
- Input 120VAC- Output 15VAC
- Integrated Circuit Breaker protection.
