

The background features a bokeh effect with various sized circles in shades of teal, green, and light blue, set against a dark blue gradient. The circles are out of focus, creating a soft, glowing effect.

All Pathway Lights.

A nighttime photograph of a modern airport terminal building with a curved glass facade. Several palm trees are planted in the foreground, each with a cylindrical concrete uplight at its base. The uplights are illuminated with green and blue light, casting a glow on the surrounding pavement. The terminal building is lit up from within, and the sky is dark. A sign on the left side of the terminal reads "TRANSPORTATION".
