## FEDERAL COMMUNICATION COMMISSION INTERFERENCE STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.

**AMBER**  
Unit Charging

**GREEN**  
Ready for shot to be taken

**BLUE**  
Processing Shot

**BLINKING WHITE**  
Firmware Upgrading

## STATS

**Carry**  
Total distance travelled from impact to landing. MLM estimates this based on your initial launch conditions, a level surface is assumed.

**Ball Speed**  
Exit speed of the ball immediately after impact

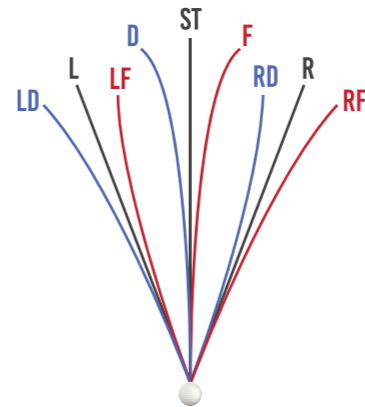

**Club Head Speed**  
Speed of your club moments before impact

**Smash Factor**  
Ball Speed divided by club speed. The higher your smash factor, the more efficiently you transfer energy from club to ball.

**Launch Angle**  
Angle of your ball relative to the ground. Combined with ball speed, will be main components to determine shot distance.

**Launch Direction**  
Measure how far from ideal line your shot lands. Center of your camera assumed to be zero degrees.

## SHOT SHAPE

**LD:** Left Draw    **D:** Draw    **RD:** Right Draw  
**L:** Left    **ST:** Straight    **R:** Right  
**LF:** Left Fade    **F:** Fade    **RF:** Right Fade

(For right handed golfers)
