Laboratory note: The estimated concentration of the unknown peak in the sample is 2.66% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC constance) and therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available (+)d8-THC. (+)d8-THC is a different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC is a different efficacies.
