

ELEVY LASH & BROW MOLECULAR RECONSTRUCTION KIT

ELEVY LASH & BROW MOLECULAR RECONSTRUCTION KIT is designed to achieve lash and brow lifting effect by using molecular refilling formula. The active ingredients penetrate deep into the lashes and brows, nourish and stimulate growth.

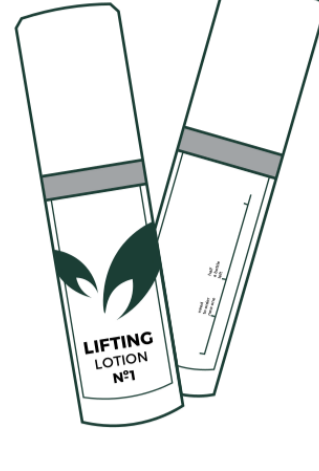

Safe to use

The unique formula is free from aggressive ingredients (ammonia in particular) and is safe to use for both clients and technicians. Gentle formula is suitable to use for clients with increased sensitivity and all types of lashes and brows (see application protocols for different hair types below).

(Optional) Personal Care add on for prolonged effect

Clients are recommended to use ELEVY PERSONAL CARE after the salon treatment for the best long-lasting results.

Lash and brow molecular reconstruction kit includes

N°1 Lifting Lotion (0.34 fl oz / 10 ml)
Lifting Lotion opens eyelash and eyebrow cuticles for deeper penetration of Volumising Fix, Care Plus and Keratin Filler

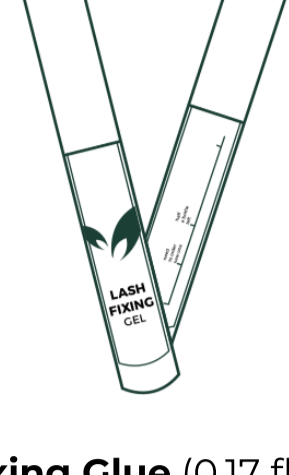

N°2 Volumising Fix (0.34 fl oz / 10 ml)
Volumising Fix solution nourishes eyelashes and eyebrows from the inside and activates the reconstruction process, contributing to the effect of the Lifting Lotion

N°3 Care Plus (EU: Botox Plus) (0.34 fl oz / 10 ml)
Care Plus is rich with collagen, protein and vitamin E. It stimulates growth and provides a healthy shine

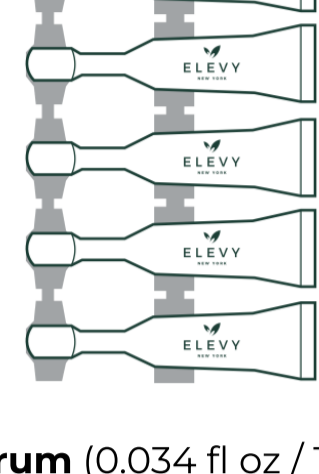

N°4 Keratin Filler (0.34 fl oz / 10 ml)
Keratin Filler coats eyelashes and eyebrows with a breathable layer of keratin, nourishes, repairs and protects the hair from harmful environments

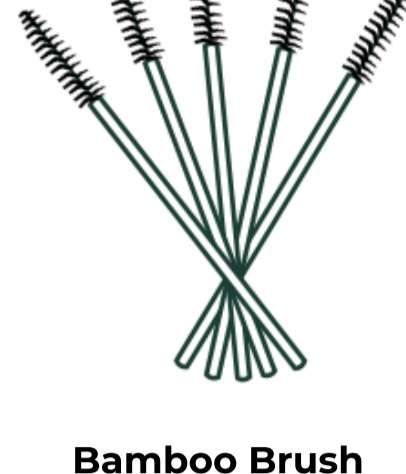

Lash Fixing Glue (0.17 fl oz / 5 ml)
Lash Fixing Glue secures the lashes to the silicone eyelash perming curler pad

Optional ELEVY PERSONAL CARE serum add on

Serum (0.034 fl oz / 1 ml)
Serum for eyelash and eyebrow personal care

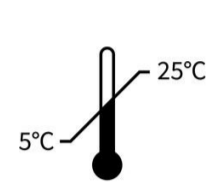

Bamboo Brush

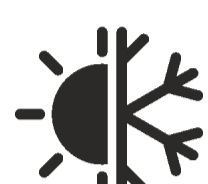

Hypoallergenic Pouch

Storage conditions

Store at 41-77°F / 5-25°C.

Do not overcool or overheat.

Avoid direct sunlight.

Keep away from children.

Keep containers closed as the products may lose their properties if exposed to air.

Recommended application protocols of eyelash reconstruction by hair type

Important for all protocols: During the application of N°1 Lifting Lotion, check the condition of the eyelashes every 2-3 minutes. You will be able to tell that the N°1 Lifting Lotion penetrates the hair as they become softer and more flexible. Apply N°2 Volumising Fix and N°3 Care Plus for the same amount of time as N°1 Lifting Lotion.

«Eyelash Gentle» Protocol

Applicable for clients with hypersensitivity and fine eyelash structure.

STEP 1 — Apply N°1 Lifting Lotion for 5-7 minutes
STEP 2 — Apply N°2 Volumising Fix for 5-7 minutes
STEP 3 — Apply N°3 Care Plus for 5-7 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

«Eyelash ELEVY» Protocol

Applicable for clients with eyelash structure of medium thickness.

STEP 1 — Apply N°1 Lifting Lotion for 8-10 minutes
STEP 2 — Apply N°2 Volumising Fix for 8-10 minutes
STEP 3 — Apply N°3 Care Plus for 8-10 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

«Eyelash Ultimate» Protocol

Applicable for clients with thick eyelash structure.

STEP 1 — Apply N°1 Lifting Lotion for 11-12 minutes
STEP 2 — Apply N°2 Volumising Fix for 11-12 minutes
STEP 3 — Apply N°3 Care Plus for 11-12 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

Recommended application protocols of eyebrow reconstruction by hair type

Important: During the application of N°1 Lifting Lotion, check the condition of the eyebrows every 1-2 minutes. You will be able to tell that the N°1 Lifting Lotion penetrates the hair as they become softer and more flexible. Apply N°2 Volumising Fix and N°3 Care Plus for the same amount of time as N°1 Lifting Lotion.

«Eyebrow Gentle» Protocol

Applicable for clients with hypersensitivity and fine eyebrow structure.

STEP 1 — Apply N°1 Lifting Lotion for 2-3 minutes
STEP 2 — Apply N°2 Volumising Fix for 2-3 minutes
STEP 3 — Apply N°3 Care Plus for 2-3 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

«Eyebrow ELEVY» Protocol

Applicable for clients with eyebrow structure of medium thickness.

STEP 1 — Apply N°1 Lifting Lotion for 4-5 minutes
STEP 2 — Apply N°2 Volumising Fix for 4-5 minutes
STEP 3 — Apply N°3 Care Plus for 4-5 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

«Eyebrow Ultimate» Protocol

Applicable for clients with thick eyebrow structure.

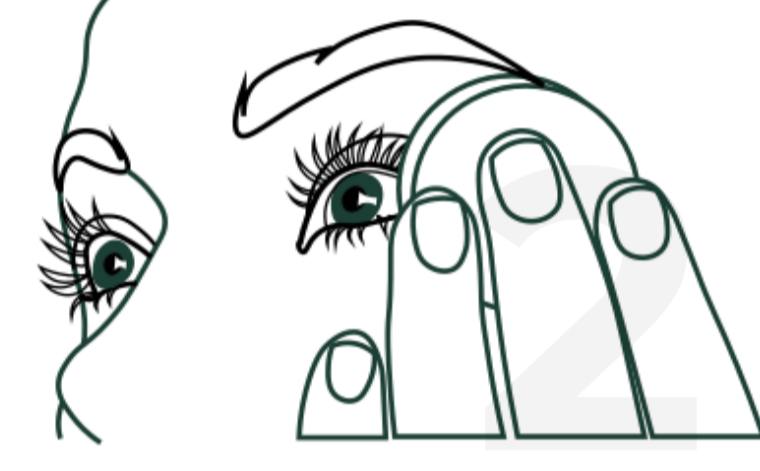

STEP 1 — Apply N°1 Lifting Lotion for 6-7 minutes
STEP 2 — Apply N°2 Volumising Fix for 6-7 minutes
STEP 3 — Apply N°3 Care Plus for 6-7 minutes
STEP 4 — Apply N°4 Keratin Filler without rinsing

Molecular eyelash reconstruction treatment

Preparations

Sanitize your hands and tools.

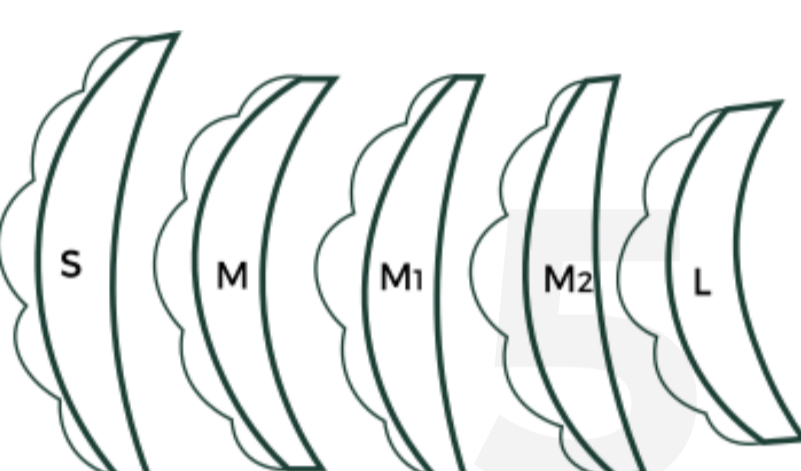

Remove any traces of the client's eye makeup or sebum using the makeup remover.

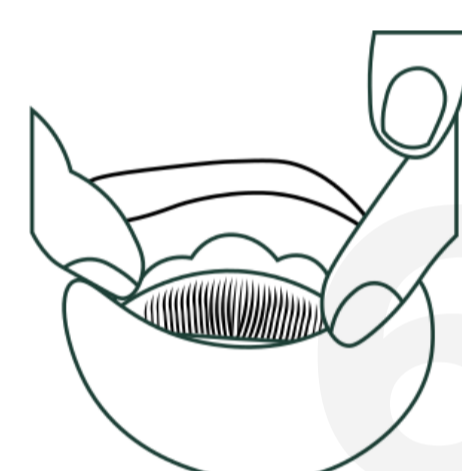

Cover the lower lashes with the under-eye patches.

Comb through the upper eyelashes with the Bamboo Brush and degrease them.

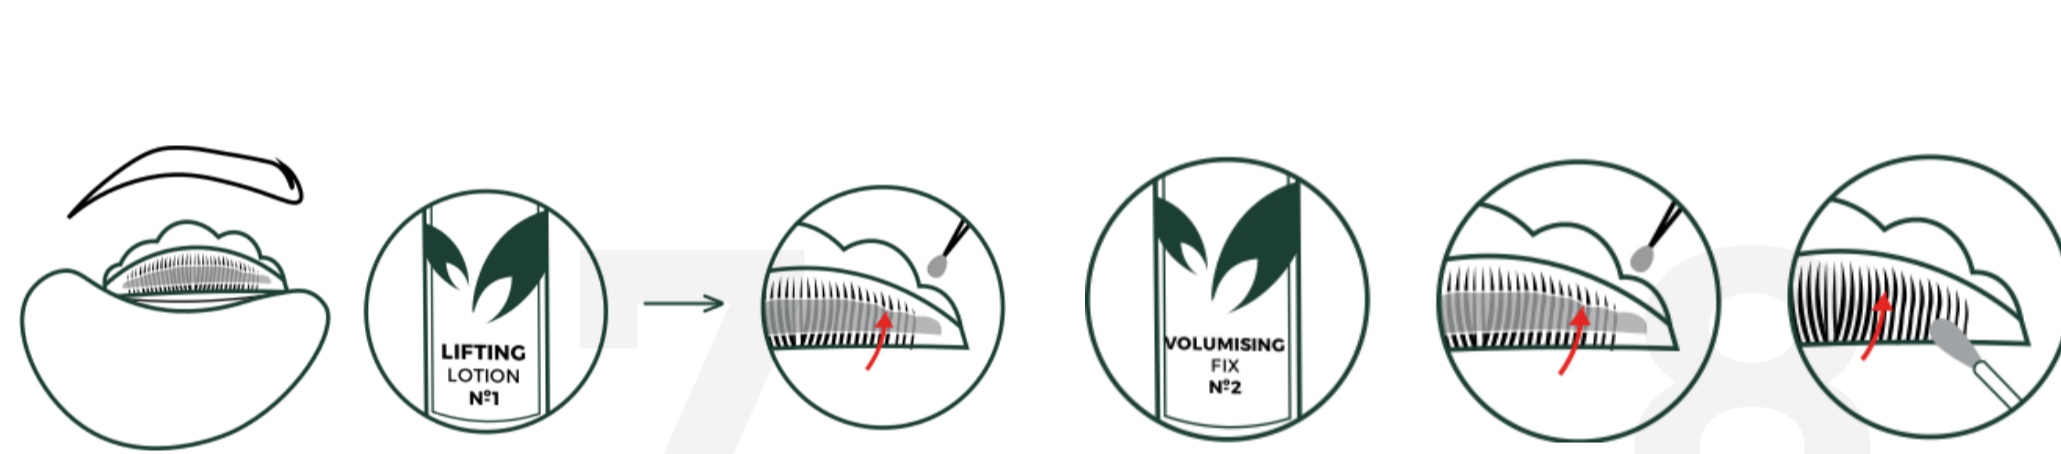

Select the size of the Silicone Eyelash Perming Curler Pads depending on the lash length of the client and the desired effect: choose size S for the shorter eyelashes, size M, M1, M2 — for the medium eyelashes and size L — for the long full eyelashes.

Place the Silicone Eyelash Perming Curler Pads to the upper eyelid as close as possible to the root of the eyelashes. It must not overlap the root or be too far from the root. Apply a small amount of the Lash Fixing glue to the Silicone Eyelash Perming Curler Pads and lift the eyelashes from the root to attach them to the pads. Please pay special attention to the placement of the eyelashes: each lash should be parallel to each other from the root to the tip, do not allow them to cross or tangle.

Application of the kit components

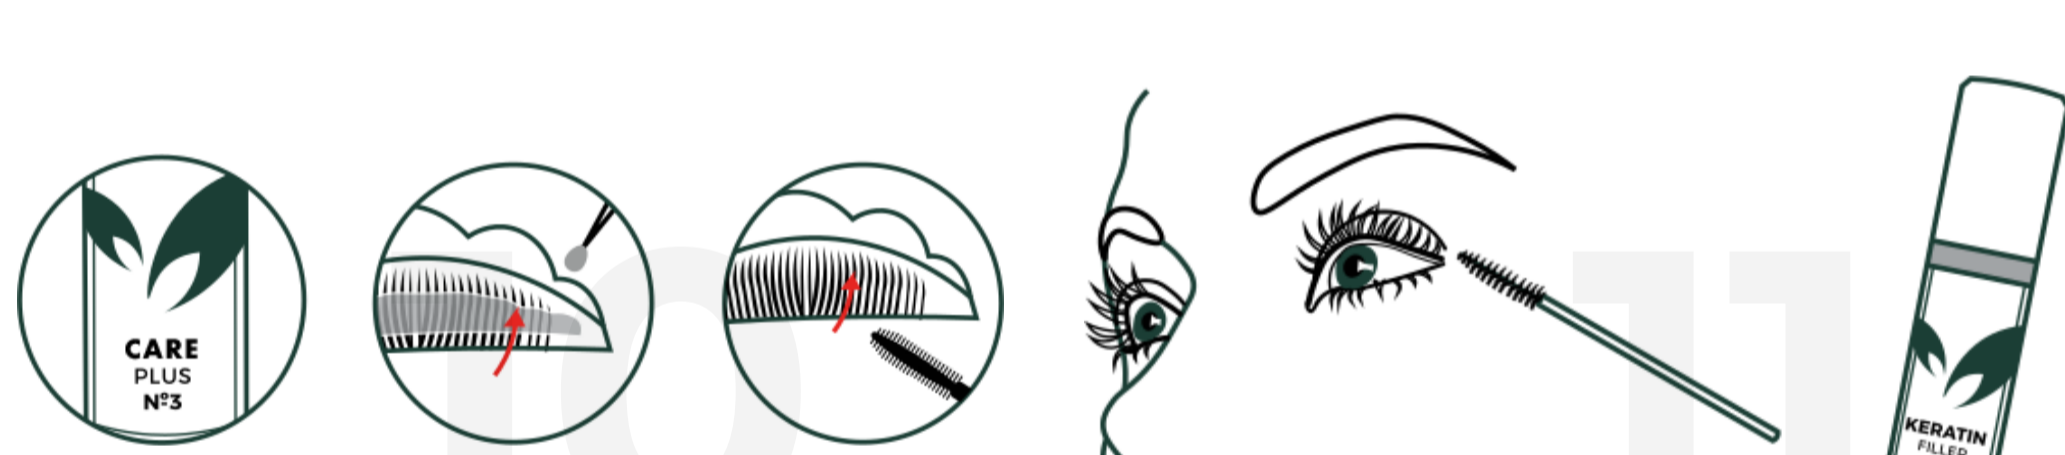

Use the Micro-Brush to apply a thin layer of N°1 Lifting Lotion to the lashes starting 1-2 mm (approx. 1/16 inch) from the root. Do not apply the lotion to the very tips of the lashes: the tips will get enough of the product during the removal. Leave the product on according to the chosen protocol, then remove it in the direction from the root to the tips of the eyelashes.

Use the Micro-Brush to apply a thin layer of N°2 Volumising Fix the same way as you applied N°1 Lifting Lotion and leave it on for exactly the same time. Then remove the product in the direction from the root to the tips of the eyelashes.

Tinting. This step is optional and needs to be discussed with the client in advance.

Important: Do not use henna based dyes during or within the first 24 hours after the molecular reconstruction treatment of eyelashes. All other dyes can be used during the treatment.

Use the Micro-Brush to apply a thin layer of N°3 Care Plus to the eyelashes. At this stage, the eyelashes may come off the curler pads. Leave the N°3 Care Plus on for exactly the same time as the N°1 Lifting Lotion. After that comb through the eyelashes with the Silicone Brush to separate them and remove the N°3 Care Plus with the Micro-Brush.

Use the Micro-Brush to apply a thin layer of N°4 Keratin Filler and leave it on.

After the treatment

Instruct the client to not wet the eyelashes for the first 24 hours after the treatment.

Salon effect maintenance

We recommend using ELEVY PERSONAL CARE serum starting the following day after the treatment to maintain the salon effect at home.

Molecular eyebrow reconstruction treatment

Preparations

Remove any traces of the brow makeup using the oil-free makeup remover.

Degrease the eyebrows. Comb through the brows with the Bamboo Brush.

Application of the kit components

Use the Micro-Brush to apply N°1 Lifting Lotion to the eyebrows and shape them as desired. Apply N°1 Lifting Lotion to the eyebrows. Leave the product on according to the chosen Personalized Mode. After that remove the N°1 Lifting Lotion in the direction from the root to the tips using a dry cotton pad.

Use the Micro-Brush to apply N°2 Volumising Fix. Leave the product on for exactly the same amount of time as the N°1 Lifting Lotion. After that remove the N°2 Volumising Fix in the direction from the root to the tips using a dry cotton pad.

Tinting of the brows. This step is optional and needs to be discussed with the client in advance. After the tinting remove the dye from the eyebrows using a dry cotton pad.

Important: Do not use henna based dyes during or within the first 24 hours after the molecular reconstruction treatment of eyebrows. All other dyes can be used during the treatment.

Use the Micro-Brush to apply the N°3 Care Plus to cover the eyebrows thoroughly. Leave the product on for exactly the same amount of time as the N°1 Lifting Lotion. After that remove the N°3 Care Plus in the direction from the root to the tips using a dry cotton pad.

Use the Micro-Brush to apply a thin layer of N°4 Keratin Filler and leave it on.

After the treatment

Instruct the client to not wet the eyebrows for the first 24 hours after the treatment. It is not recommended to swim, work out, sweat or use a sauna.

Important

Use a new Disposable Micro-Brush for every step.

Do not switch the lids of the products.

Keep the product N°1 Lifting Lotion and N°2 Volumising Fix containers and lids clean at all times. After you are done, put the lids on and tighten them.

In case of contact of any product with the eyes, rinse immediately with water.

Do not use

Molecular reconstruction of eyelashes and eyebrows is not recommended if:

- Within the first 14 days and eyebrow areas is damaged (scratches, acne, rashes, skin infections, irritation, psoriasis);
- Within the skin on the eyelash of the following treatments: eyelash/eyebrow lamination, eyelash/eyebrow perms, eyelash/eyebrow tinting;
- Within the first 30 days of eyebrow microblading or tattooing.
