### ITPP (MYO-INOSITOL TRISPYROPHOSPHATE)

O=P(O)(O)OC1OC2C(C1)OC3C(C2)OP(=O)(O)OP(=O)(O)O3

#### Main Benefits

- ITPP helps to regulate healthy uptake and release of oxygen in red blood cells.
- ITPP's ability to enhance oxygen delivery throughout the body as been found to increase and optimize physical performance.
- ITPP has also been found to help ease stress that is typically caused by low oxygen levels within the body.

#### Main Cautions

- While ITPP has been shown to increase physical performance, its usage is banned in professional sporting events.
- Although ITPP is relatively safe as a supplement, we still highly suggest that you **do not exceed the recommended serving size**.
- Consult your physician before using ITPP if you are taking any medication.

#### Usage Tips

- A 1.7cc measuring scoop is included. One level scoop contains approximately one serving, or approximately **1000mg of ITPP**. As a dietary supplement, take 1-2 servings up to 2 times per day. Start at the lower suggested quantity to assess response.
- This supplement is not intended to treat, diagnose, prevent, or cure any diseases. Consult your healthcare provider before use if you have a medical condition or if you are taking any prescription medications.
- The negative effects of ITPP are dependent on the amount taken, so use of a scale with 10mg/0.01g accuracy is recommended for reliable measurement.
- It is safe to stack ITPP with other supplements, so long as the amount consumed does not exceed the suggested serving size.
- Use of capsules, or mixing with tea, yogurt, apple sauce, or oatmeal may help make the powder more tolerable.
- The benefits of ITPP are most effective when they are supported by a healthy diet and plenty of exercise.
