After clicking on “View” for the relevant Unit, an exploded view of parts will be displayed.

To navigate between the exploded view and the parts list, you have two options:

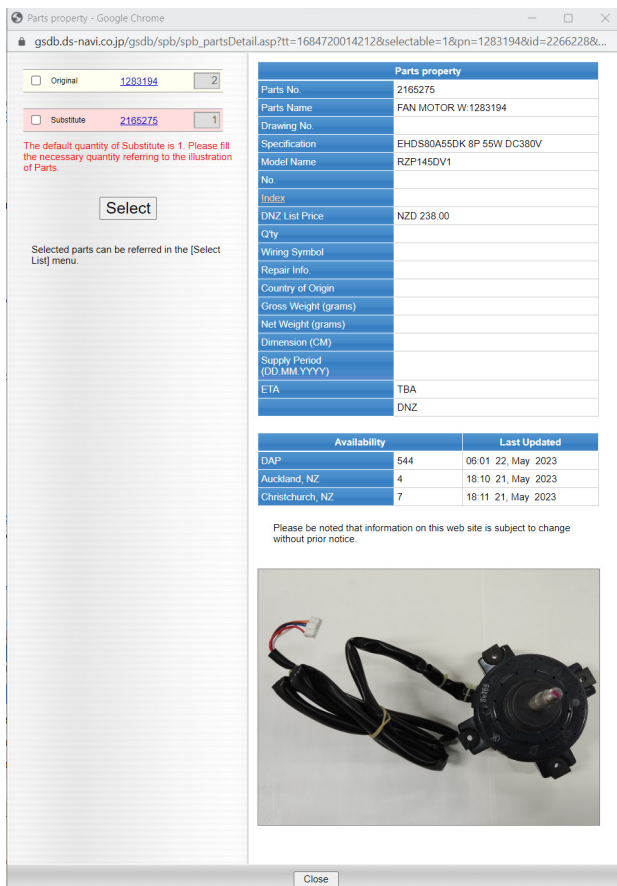

- Click on a part directly from the exploded view. This action will automatically take you to the corresponding part code in the parts list.
- Alternatively, you can search the parts list for a specific part name or code (Parts No.). Once you locate the desired part in the list, click on that part listed. This action will redirect you to the location of the part in the exploded view. You can examine the part in its context or proceed with ordering.

By utilising these options, you can seamlessly navigate between the exploded view and the parts list to access detailed information about the parts you need for the selected Unit.

Once you have identified the parts you need, you can begin the ordering process.

- Select the specific part you require from the parts list or exploded view.
- Click on the **“Detail”** button for the selected part. This action will bring up the detailed information for that particular part.
