| Dimensions mm<br>L×W×H                               |                 | 400×252×336  |      |      |      |      | 370×252×336   |      |      |      |      |     |  |  |  |  |  |  |
| Mass kg  |                 | 25   |      |      |      |      | 23  |      |      |      |      |     |  |  |  |  |  |  |
| Cooling system                                       |                 | Air-cooled   |      |      |      |      |   |      |      |      |      |     |  |  |  |  |  |  |
| Others   |                 | With hour meter and air flush  |      |      |      |      |   |      |      |      |      |     |  |  |  |  |  |  |

Note 1 : Pumping speed and ultimate pressure remain roughly the same when air flush is ON(opened) and OFF (closed).

Note 2 : Noise level is measured at ultimate pressure in an anechoic room.

Note 3 : Leak tightness is measured when pump is stopped and air flush is OFF (closed).

Note 4 : Water vapor handling is less than 25g/day when air flush is ON (opened).

Air flush volume is 10 liters/min.

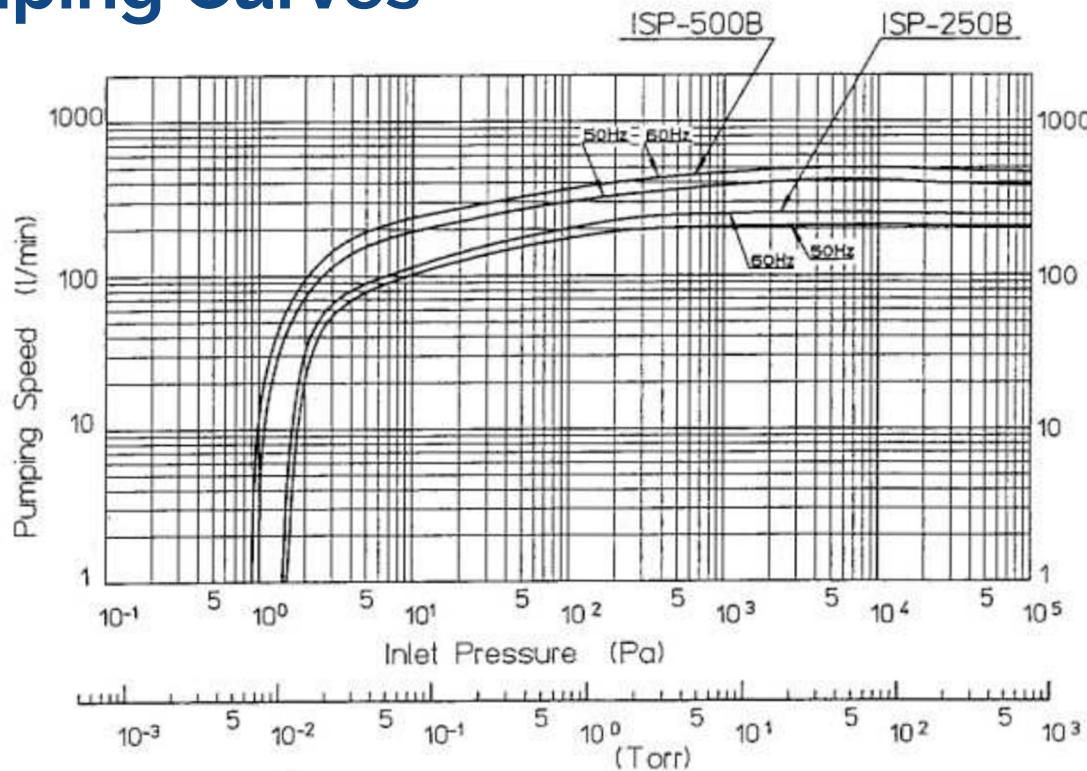

Note 5 : Air flush is OFF (closed) when pump is delivered.

## Anest Iwata ISP-250B Pumping Curves

## Dimensions

## Anest Iwata ISP-250B Features & Benefits

- air-cooled, oil-free scroll-type vacuum
- low noise & vibration
- compact design
- no lubricant maintenance or sealing water administration
- free from installation restrictions
- low power consumption

## Applications

- sputtering/vacuum deposition/ion plating equipment
- accelerator & synchrotron radiation
- surface modification
- electron beam process
- gas recovery devices
- vacuum equipment
- leak detectors
- device handling system
- vacuum/heat treatment furnace
- laboratory use
- vacuum packaging machine
