

Table of contents

Foreword	5
Conventions	5
The website	5
Introduction	6
1. GETTING STARTED	
Finding a user	9
Choosing a Problem	11
So What's the Problem?	12
Dangerous Ideas	13
Starting	14
Introducing Mastery Aspects	16
Which Mastery Aspects?	18
Planning	18
2. ANALYSIS	
A1 Analysing the Problem	21
Goals for A1 - Analyzing the Problem	22
Method 1: Interviews	23
Method 2: Questionnaires	24
Method 3: Observation	27
Method 4: Gathering Existing Documentation	28
Tips on Organizing Section A1	31
A2 Criteria for Success	33
Online Processing	36
Batch Processing	36
Scope and Limitations	37
Tips on Organizing Section A2	39
A3 Prototyping	40

3. DESIGN

Initial Design	41
Prototype	41
Stage B – Detailed Design	43
B1 - Data Structures	53
Example Data Structure Design	54
B2 – Algorithms	56
B3 – Modular Organization	61
Subsections of B3	61
Organizing Section B3	67

4. THE PROGRAM

C1 – The Program	69
C2 – Handling Errors	74
Subsections of C2	74
Organizing Section C2	79
C3 Success of the Program	79

5. DOCUMENTATION

D1 - Sample runs and other Screenshots	81
Example of Annotated sample run	82
D2 - Evaluating solutions	82

APPENDICES

Appendix A - Further Samples of Using Mastery aspects	85
Appendix B - Tools for Analysis and Design	87
Diagrams and Charts used in the Design Phase	94
Appendix C - Security and Backups	97
