PRECAUTIONS

TRANSPORTATION

When transporting the product, please make sure the device is turned off and unplugged.

INSTALLATION

Use it after properly attaching the body's upper and bottom parts. Make sure the purifier inlet surface is at least 4 inches away from the wall.

POWER CORD

Severe pressure or bending the power cord could cause damage. Do not use inadequate or non-certified power adaptors. Do not temporarily replace the power cord with inadequate or non-certified power adaptors. Do not pull the power cord with force when unplugging. User must hold the plug of the power cord when connecting. When transporting or cleaning the device, please make sure to turn the power off and unplug the product beforehand.

IN USAGE

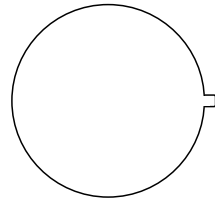

Immediately stop the purifier if it behaves oddly. Do not cover the air inlet area.

REGULATIONS

Do not use the purifier in humid locations.

TOP

PRODUCT CONNECTION

1. Remove the vinyl cover from the main body.

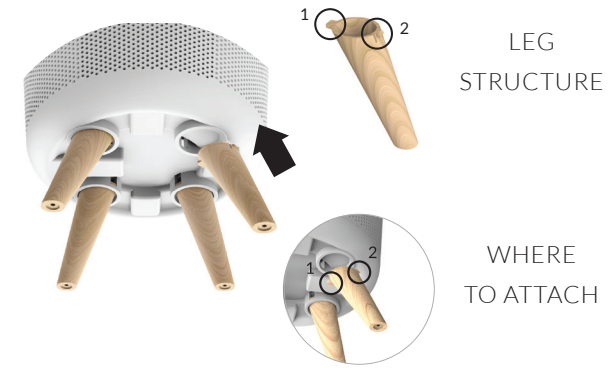

2. Remove the filter by lifting the top part of the purifier and remove the protective cover from the filter.

3. Insert the filter into the base and attach the top part of the purifier on the base.

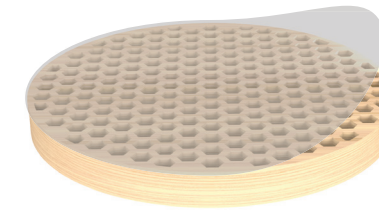

Please make sure to line up the arrows when attaching the top part to the base.

PRODUCT CONNECTION

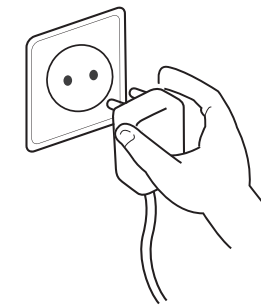

4. Attach the legs to the main body.

Please make sure to attach the first hook (1) to the main body and push the second hook (2) until you hear a clicking sound.

5. Remove the vinyl from the Maple Wood panel and place it on the air purifier.

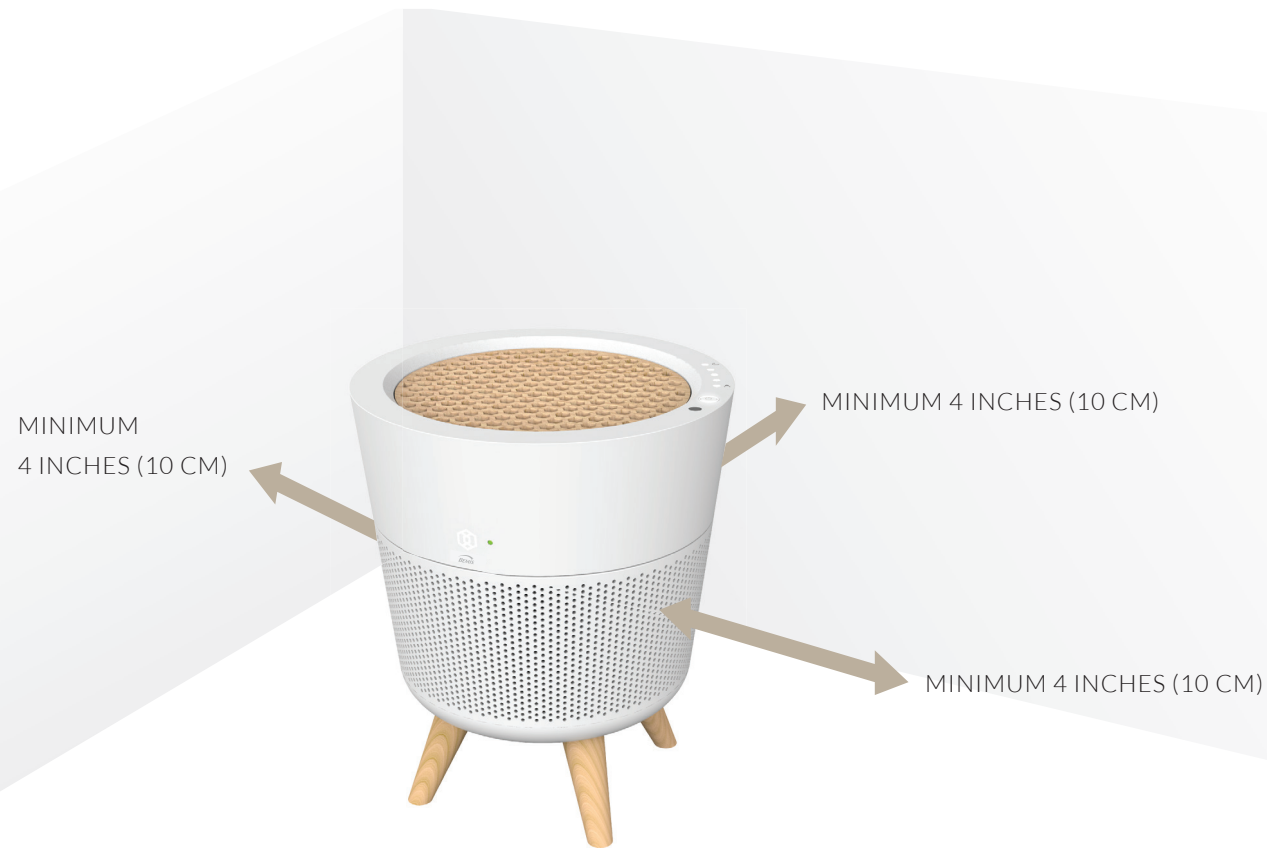

Remove the vinyl from the Maple Wood panel And assemble it to the main body.

6. Connect the power cord to a power outlet.

 Do not touch with wet hands

USAGE LOCATION

INDOOR USAGE

Do not place the product on uneven surfaces.
Make sure to check if the intake holes are clean and in open space.
Place the provided transparent cover on top when not using.

PRODUCT FEATURES

FILTER REPLACEMENT INDICATOR

The LED logo will blink for 5 seconds with a buzz when you turn on the device, indicating the filter needs to be replaced.

After you have replaced the filter, press & hold the power button for 3 seconds to reset the filter replacement indicator.

LED LIGHT & LED INDICATOR

LED Logo can provide ambient lighting effects, and the LED indicator shows the air quality in 3 different colors.

- Good
- Normal
- Bad

Ambient Light Sensor

Oil Capsule
(Optional)

PRODUCT FEATURES

POWER

Turn the product on and off. Press & hold the power button for 2 seconds to turn ON/OFF the device. When powered on, the device will start in the previously used mode.

AMBIENT LIGHT SENSOR

(For Auto mode only)
Automatically changes mode based on the brightness of the room. Automatically activates night mode when in dark areas, and returns to auto mode once the area brightens up.

SLEEP & ECO MODE

Power saving mode is recommended to use when you go to sleep. It will reduce the fan speed when this mode is active, which is suitable when sleeping.

WIND POWER

(2 LEVELS + CYCLONE MODE)

Adjusting the fan speed. Press the power button to select between low, medium, cyclone mode. (Turbo mode : After 3 minutes of operation in cyclone mode, it will automatically change to auto mode.)

LOW 

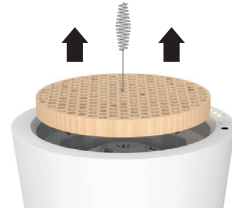

MEDIUM 

CYCLONE 

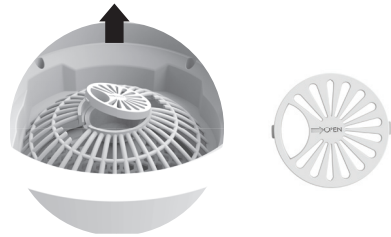

AUTO MODE

Automatically change the fan speed according to the air quality, using the dust sensor situated at the back of the purifier.

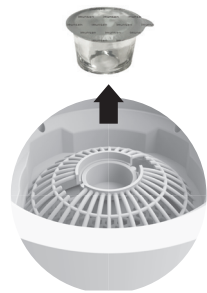

DIFFUSER OIL CAPSULE USAGE (OPTIONAL)

1. After turning off the product, use the detaching hook (accessory) to open the Maple Wood panel.

2. Use your fingers to remove the capsule.

3. Remove the top foil from the capsule.
Do not poke the clear protective film that contains the essential oil.
Available oil scents come in lavender and eucalyptus.

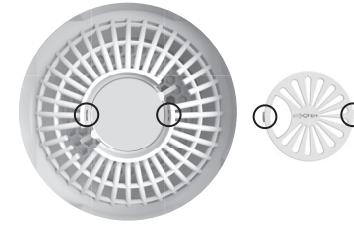

1. Remove the protective cover

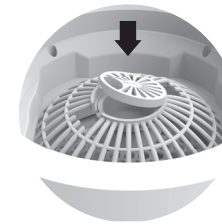

2. Do not remove the transparent film.
(Otherwise the oil could spill.)

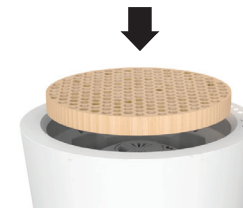

DIFFUSER OIL CAPSULE USAGE (OPTIONAL)

4. Make sure the two holes are properly aligned.

5. Re-attach the capsule cover.

6. Re-attach the maple wood panel before turning on the product.

MANAGING THE PRODUCT

CLEANING THE EXTERIOR

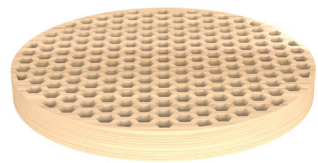

1. Use a vacuum cleaner to remove dust from the air intake and air outlet.
2. When the air purifier is not in use, place the provided cover on top of the maple wood panel to prevent dust from entering.

CLEANING THE FILTER

1. Remove the filter from the main body.
2. Use a vacuum cleaner to remove larger dust from the pre-filter.

Do not use water to clean the filter.
It will decrease the filters lifespan.
