

Montar Chemical Restrictions

17.04.2023

Montar Chemical Restrictions:

At Montar we wish to make sure that our consumers can trust our products to be free of any unwanted chemicals. Furthermore, we see it as our obligation to make sure that the workers producing our garments are not exposed to dangerous substances in the process. Therefore, we have made this Chemical Restrictions that we need all our suppliers to comply to. **The Chemical Restrictions of Montar is not absolute, and the supplier is obliged to follow any given legislation at any given time. The restrictions apply to all finished products, raw materials, accessories incl. all metal trims, labels, packaging, moisture bags etc.**

Compliance with our Chemical requirements is part of the foundation upon which our cooperation is build, and one of the cornerstones of Montar's work to supply safe and clean products to our valued customers. You as a supplier to Montar is a crucial part of this work, as your supply chain is where the risk of unwanted chemicals being introduced to the process is the biggest. It is your responsibility as our supplier to make sure your supply chain has a set-up that makes it impossible to use unwanted chemicals in the production, so that the end-product will be free of any of these chemicals. You should do this by making sure your sub-suppliers are in compliance and setting up a control procedure and a test program to ensure compliance. Having the right set-up and requirements early in the process, reduces cost and testing further down the supply Chain.

The chemical substances below are either restricted or forbidden by law in the EU countries, Canada, Norway or by national legislation in Denmark or Germany. Some restrictions are included by Montar to set a high level of chemical consumer protection.

It is the responsibility of the supplier to ensure, that the chemicals listed below are either not existing or below the limit stated in our restrictions. Montar will perform random chemical testing to ensure that all our suppliers adhere to our Chemical Restrictions. In case the product fails in test, Montar has the right to cancel the order or ask the supplier to re-make at the cost of the supplier. In case of cancellation, delay, or increased transportation costs, Montar will claim the supplier for this cost including lost profit. Furthermore, any cost regarding legal handling relating to an issue relating to a non-compliance of our Chemical Requirements will be claimed from the supplier who caused the non-compliance.

In case of a failed random test performed by Montar, the cost of this test will be forwarded to the supplier, and a follow up test program for future shipments will be set-up at the expense of the supplier.

Focus on textile business in EU:

In EU there is a huge focus on traceability, environmental footprint, circular economic and due diligence - which all are topics, Montar and you as our supplier, cannot ignore. During the coming year we must adapt to new regulations and demands.

REACH:

As a supplier to Montar, you are under obligation to abide to REACH – Regulation (EC) No 1907/2006 of the European Parliament and the council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals. And as such you are obliged to constantly keeping yourself up-to-date with any changes in the REACH regulation. This can be done by regularly consulting the following link: <http://echa.europa.eu>

Regarding the REACH Substances of Very High Concern (SVHC's) the limit for all products and packaging is 1000 ppm (0,1%)for each substance on the list - **UNLESS A LOWER LIMIT IS SPECIFIED IN THIS DOCUMENT**. You are obliged to follow the development of this list, as new substances are added on a regular basis. Link to the list: <http://echa.europa.eu/web/guest/candidate-list-table> Currently on 17th of April 2023 the list contains 233 substances. From January 2023 the list has been expanded with 9 new substances and is predicted to be increased during 2023. Please make sure to be updated by checking the list on regular basis.
