

## **PRIVATE LABELING PROGRAM**

Renegade Products is one of the few car care chemical companies that actually manufactures products in house. As such, we offer a robust line of car care chemicals such as soaps, degreasers, all purpose cleaners, liquid metal polishes, waxes etc. We manufacture and private label for some of the largest car care companies in the world and offer complex custom formulations that fit any car care brands needs. We boast THREE automatic bottling machines that bottle, label & cap...helping to lower costs that are extended to your brand!

### **CAN I CUSTOMIZE MY CAR CARE CHEMICALS SCENT AND COLOR?**

You can absolutely customize your formulas and chemicals. We have over 30 scents and essential oils to choose from with the ability to even choose or obtain custom scents that specifically fit your brand identity. We offer the same service for custom colors in formulas. You can choose between exotic colors such as neon's and obviously normal colors on the color spectrum.

### **CAN I CUSTOMIZE MY CAR CARE CHEMICALS SCENT AND COLOR?**

We offer turn key private labeling solutions to many brands. Turn key solutions involve us providing the following: Label design and creation, sourcing of bottles, caps, spray triggers & plugs for bottles...in addition to custom formulations and of course the fill! Everything from A to Z renegade products can handle in your automotive chemical needs.

### **WHAT IS THE MINIMUM ORDER QUANTITY FOR A PRODUCT FOR PRIVATE LABELING?**

The answer to this question is largely predicated on what type of private label you are looking to do. We offer 9 of our most common private label products in small batch MOQ's that are 60 bottles each in a 16 ounce bottle. With this small batch service you will be required to go with our standard color, scent, 16 oz bottle and custom label with your designated information. Outside of this, if you are looking to order your own scent and color, you will be required to order a minimum of one drum worth of product which comes out to ~440 bottles of a 16 oz filled bottle. If you want the maximum savings for yourself you can just order a 55 gallon drum from us and convert it yourself into the packaging of your choice!

## CAN I REVERSE ENGINEER A FORMULA?

Renegade Products has everything required to completely engineer and re-engineer a formula given from another brand, company or manufacturer. With a state of the art laboratory and full-time chemist on staff, we can take a formula and give you a nearly identical formula that would suit your brands needs.

**BELOW ARE PRODUCTS WE OFFER FOR PRIVATE LABEL IN  
DRUM OR IN CONVERTED 16 OZ BOTTLES**

**MOQ IS 1 DRUM WORTH OF PRODUCT.**
