

TwinTec S4 Water Softener

Perfectly tailored to the UK market

Why choose TwinTec?

The S4 is TwinTec's next generation water softener. It has been designed and manufactured in England to work with all British plumbing systems. With its twin cylinder design, the TwinTec Water Softener is able to provide you with luxuriously softened water all day, every day. An investment in a water softener is an investment in your family and entire home.

Features and Benefits

Small and compact

The TwinTec S4 is designed to be fitted under the kitchen sink. Allowing 100% softened water without compromising space.

Twin parallel cylinder design

The twin parallel cylinder allows for softened water 24 hours a day with more than enough capacity to supply softened water to a large family. Our parallel system ensures water is fresh for you and your family.

Non-electric, great efficiency and low running cost

With a focus on sustainability, the TwinTec S4 is built with no timers, motors, adjustments or complicated programming. It is non-electric, saving energy and offers outstanding efficiency in both salt and water usage.

Low pressure design performance

An enhancement feature that ensures your water softener performs to its full potential. Whether your water is supplied at a lower pressure or your family requirements cause fluctuations in pressure, our low pressure injector ensures maximum reliability.

Block salt

Easy to handle and store.

High flow rates

A max flow rate of 56 litres per minute ensures power showers and megaflores are no problem.

Smart shuttle metering

Using breakthrough technology, this water softener includes smart shuttle metering, which is designed and manufactured to cater for the intricacies of all British plumbing systems. From tanks in the loft to combination boilers and high flow unvented hot water cylinders, this water softener does the job.

Durability tested

Built for maximum durability. Robustly tested for total reliability exceeding UK standards.

Why is softened water beneficial?

Softened water offers many benefits to you and your home, all made accessible with a TwinTec S4 Water Softener. Existing limescale will be eliminated and your home will be protected from future build up. This will reduce cleaning time around the home, create less need for harsh cleaning products and make your home shine.

With softened water, appliances work for longer and are less likely to break. Your boiler and pipes will stay unblocked, resulting in them running more efficiently; saving you money on your heating bills.

Your skin and hair will also benefit. New research confirms that softened water can greatly alleviate symptoms of eczema and other dry skin conditions. You will also only need half as much shampoo to produce a much better lather, finding your hair to be shinier and more manageable.

Hard Water

Soft Water

TwinTec S4 Water Softener

Dimensions	Height: 49.0 cm, Width: 20.5 cm, Depth: 44.0 cm
