

# INSTRUCTIONS

## ARMOURED LABS SURF PREMIUM SERIES

### Application Instructions

Congratulations on your purchase of Armoured Labs SURF. This Marine Grade Ceramic Nano Coating is designed specifically to protect, enhance and prolong the life of Paddleboards, Inflatables, Surfboards, Skim Boards, Foil Boards, Foils, Inflatable Wings and Sails, and sunglasses.

#### SURFACE PREPARATION

1

- Ensure surfaces are clean and free of debris.
- Ensure your surface is dry before beginning your application.
- For best results, we recommend applying your nano-coating indoors in temperatures between 41°F - 86°F (5°C - 30°C).

#### APPLYING THE COATING

2

- Turn the spray nozzle to the open position.
- Holding your spray bottle approx. 10cm away from the surface, spray the nano-coating liberally over all surfaces you wish to coat.
- Armoured Labs SURF dries almost immediately. If applying to lenses of sunglasses, wait 5 minutes before buffing off excess residue with a microfibre or soft cotton cloth.
- Wipe off excess residue with a microfibre or soft cotton cloth excluding foam, EVA Surf Grip and Sails.

#### POST APPLICATION

3

- Wait 4 hours from when you applied the nano-coating before getting wet.
- Shred on! Re-apply as required. Your Armoured Labs SURF nano-coating will last 6+ months before re-application is required.

GET ARMoured!  
STAY PROTECTED!
