Genotropin Pen HGH (human Growth Hormone) - 36 IU (12 mg) is used for human growth hormone replacement therapy. It is a synthetic 191 amino acid sequence identical to human growth hormone that is naturally produced in the body by the pituitary gland. Human growth hormone can affect the use of carbohydrates and fat in the cells. Take pfizer genotropin pen 12mg (36iu) out of the refrigerator approximately 1/2 hour before your injection. This will bring it to room temperature (about 25°C). It is more comfortable to inject at this temperature. When using the pfizer genotropin pen 12mg (36iu) always remove the injection needle before storing in the refrigerator.
