

# How to Attach the beachBUB SunVisor

while you're at the beach

**IMPORTANT TIP** - Clip the carabiners on in this direction, with the orange side facing toward the umbrella and the opening of the clip facing outward. They are easier to attach in this direction.

Rest the Visor on your shoulder. Choose the panel that will give you the most sun protection and attach an orange carabiner to one rib ring. Clip the 2nd orange carabiner to the other rib ring.

Release the middle blue strap. The 2 side wings will drop down as shown.

Release the 2 red straps. The SunVisor will drop.

Attach the left wing with the bare carabiner and then attach the right wing.

Now all 4 carabiners are attached.

# How to Remove the beachBUB SunVisor

while you're at the beach

Fold up the SunVisor by tying the left and right RED straps. Do not tie the middle blue strap yet at this time.

Detach the left and right wings and let them drop down.

Lift both wings to the middle and secure by tying the BLUE strap.

Unclip the left and right orange carabiner clips to remove the SunVisor from the umbrella. Place the SunVisor into its sleeve and then into the beachBUB Carry Bag.
