PASTELS

Sky-colored cabinets blend seamlessly with black or white accessories in the kitchen.

Spring's most popular colors are pure eye candy. Add a few accents to any room for an instant update.

Place the Hana 2-Drawer Lacquer End Table (\$142; overstock.com) near a bed or sofa.

Powder BLUE

This cool color is calming so you can sit back and relax.

PAIR POWDER BLUE WITH...

BUTTERY CREAM

Why it works:
A barely there shade helps this whimsical blue stand out.

DEEP TEAL

Why it works:
Hints of peacock complement but don't overpower.

CRISP CHARTREUSE

Why it works:
Yellowish-green touches keep the room fresh and fun.

The crosshatch-patterned Farah Cushion (\$64; lauraashleyusa.com) is brighter than gray but just as versatile.

» A subtle raised floral design on the base of the ceramic Pastel Table Lamp (\$39.99; at HomeGoods stores) gives it a handmade look.
