by Infection Prevention Products 

**Purchase the WikiPouch®**  
(formerly IP-Pouch) from the  
**Distributor of your choice,**  
**including...**

**MCKESSON**

Empowering Healthcare

## **Plastic Bags Cost Too Much!**

- 1. PLASTIC BAGS Need to be Replaced Each Week:** Plastic Bags, plus the time to put them up each week cost over \$5 per month. The WikiPouch® is replaced **once per month** with an MSRP of only \$1.99. (Volume Discounts available)
- 2. PLASTIC BAGS Allow Microbes to Survive and Thrive:** MRSA & VRE survived longer on Plastic (**Over 90 Days**) than on any material tested that is common in healthcare facilities. -*Journal of Clinical Microbiology*.  
In University studies, Plastic Bags increased Staph microbes 28% in 1 hour on a Nasal Cannula.
- 3. PLASTIC BAGS Increase Respiratory Infections:** In field trials, Plastic Bags increased respiratory infection while the WikiPouch® reduced respiratory infections over 60% compared to the use of Plastic Bags.
- 4. PLASTIC BAGS Increase Mortality:** In Nursing Homes, respiratory infections caused by influenza, parainfluenza, and respiratory syncytial viruses are often fatal. Nursing homes, which generally have older and frailer residents, can experience attack rates up to 60% and case fatality rates as high as 55%. -*Infectious Disease Clinics of North America 2007*
