

# KERASAVE

MEDIUM FOR CORNEAL STORAGE AT 4°C  
12 VIAL PACK + 1 BLISTER PACK OF 12 TABLETS + 12 DONOR EYE CAPS

## STORAGE AT 4°C + COSMETIC RECONSTRUCTION

	KERASAVE SOLUTION	AMPHOTERICIN B TABLET	DEC
<b>Ingredients</b>			
	MEM balanced salt solution	soluble amphotericin B	
	gentamicin	excipients	
	streptomycin		polyacrilate
	dextran		
	bicarbonate		
<b>Form</b>	sterile liquid	sterile tablet	solid
<b>Size</b>	20 ml	42.5 mg	2.8x2.4 cm (L x w)
<b>Chemical-Physical Parameters</b>			
Hydrogenionic activity	7.20 - 7.60 pH units	not applicable	
Osmolality	255 - 345 mOsm/kg	not applicable	
Gentamicin content	100 - 110 µg/ml	not applicable	
Streptomycin content	200 - 220 µg/ml	not applicable	
Amphotericin B content	not applicable	45 - 57.5 µg/tablet (2.25 - 2.88 µg/ml in KERASAVE solution)	not applicable
Dissolution time in KERASAVE solution	not applicable	about 20 min under stirring	
Bacterial endotoxins	< 0.5 EU/ml		
<b>Sterilization</b>	aseptic filtration and filling according to EN 556-2 and EN 13408-1	gamma rays according to EN 556-1 and EN ISO 11137-1	non-sterile
<b>Packaging</b>	20 ml vial	blister pack of 12 tablets	pouch
<b>Storage temperature</b>	+2°C / +8°C	+2°C / +8°C	not applicable
<b>Expiry date</b>	24 months	24 months	60 months
<b>Intended use</b>	corneal storage at +4°C	antifungal agent	cosmetic reconstruction of donor eye
Temperature of actual use	+2°C / +8°C		
Duration of actual use	up to 14 days		not applicable
<b>Class</b>	medical device	medical device	not applicable
<b>CND code</b>	Q020299		not applicable
<b>Medical device class</b>	IIa		not applicable
<b>CE mark</b>	CE 0477		not applicable

KERASAVE is a corneal storage medium containing antibiotics and an antifungal agent (Amphotericin B). The device consists of a solution and a tablet containing Amphotericin B to be dissolved in the liquid before the introduction of the tissue.

The reconstituted solution is a medium that enables the hydration of the cornea and slows down the cell degeneration process thanks to the temperature of 4°C.

The combined presence of an antifungal agent and antibiotics ensures the microbiological quality of the storage environment.

The optically clear vial bottom allows to evaluate cornea by specular microscopes (e.g. Konan, Hailabs) with no need to transfer it to another container, thus reducing contamination.

**Ref.: KER 002-00**

### Contents:

- ▶ 12 20ml vial pack
- ▶ 1 blister pack of 12 tablets
- ▶ 12 DEC
- ▶ 12 labels for product traceability
- ▶ 1 pH color control scale
- ▶ 1 package insert

**GS1-128 barcode**
