17 MS-CM-DL2

**IMPORTANT:** Since there are different versions of each product based on your region, please make sure you are using the correct set of instructions. The part number below should match the one on your box.

**IMPORTANT:** Due to the nature of cut aluminum profiles, some metal shavings may remain despite our thorough QA cleaning process. We recommend opening boxes and packaging on a hard surface.

**NOTE:** Some screws and washers may be pre-installed. These are included in the parts list and will need to be loosened and reattached according to the instructions.

Recommended: Two people for the task

Tighten the hardware

Keep the hardware loose for adjustments

Make the necessary adjustments

Break the tab off the corner bracket

Safety glasses required

Attention/Priority needed

Reserve for the next step

Mirrored components (same on both sides)

# NOTE

## INSTALLATION ORDER FOR SCREWS & WASHERS

## HOW TO MEASURE SCREWS

# NOTE

## NS-M8 & NS-M6

Slide T-Nuts into the ends of the profiles. Some must be added early, so follow the steps in this manual carefully.

If you miss one, tilt it in from the outer edge. Use the Allen key to push it into place, ensuring the hole lines up.

Use the provided Allen key to push the T-Nut into position, ensuring that the hole slides into place correctly.

# NOTE

## BC-40 & CB-40

These brackets come with guide tabs on the rear. These tabs help align the brackets to the profile when fitted in the same orientation as the profile. When used in the alternate orientation, these tabs are designed to snap off for a flush mount against the profile.

# MS-CM-SIN2

# 1

# 2

Join part from Step 1 to side bracket (L & R)

# 3

# 4

# 5

Use parts 4 & 2 together

# 6

Ignore this step if your monitor does not require these VESA extension plates.

These 4 plates are designed to increase the VESA mounting positions to 200, 300 and 400mm which may not be required for your monitors/TVs.
