- Over a Thousand Free Design Templates
- RightON® Color Matching
- Full Speed Variable Data
- Sequential Numbering
- Multipart Forms Creation
- Job Cost Estimator
- Imposed Stack Order Printing AND MUCH MORE!

Welcome to the NEW iQueue 14 Workflow. Xante builds on its innovative workflow software with powerful team-based productivity in the new iQueue 14. For the first time, you can take advantage of your entire team of information technology specialists, creative designers, and digital press operators to produce completed jobs on your Xante digital presses in record time with minimum disruptions. Now true server-client operation enhances the workflow within your business to optimize the talents and time of everyone involved with production. iQueue 14 will continue to simplify prepress tasks with NCOA™ Verification, USPS® certified CASS™ with Presort, job cost estimating, variable data with Intelligent Mail barcodes, QR code generator, patented Right-On Spot Color Matching and much more.

NEW Job Sharing via Shared Folders

iQueue 14 allows any user on the network to designate any or all job folders within their iQueue as shared folders. Once designated, jobs within that folder are immediately visible to other iQueue users on the same network. All iQueue users will be able to open, modify, and print these jobs as well as add or delete jobs in the shared folders.

Fast, simple and powerful.

iQueue For Everyone

The powerful iQueue workflow software includes a site license which means you have unlimited installs for all the users at your shop. Everyone can use all the powerful features of iQueue and you can easily share jobs between users.

Amazing Adobe® PostScript® PDF Workflow

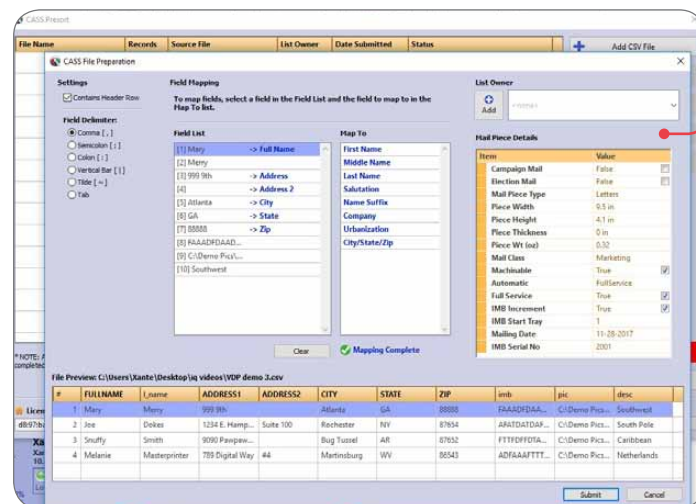

True Adobe® Postscript® is at the core of iQueue® and it's packed with advanced imaging features. iQueue could not be easier to use. With beautiful spot color matching, full imposition, fast variable data and so much more, iQueue 14 keeps  Adobe PostScript 3™ your jobs on the shop floor and out the door.

XANTÉ

USPS® certified address verification, correction, sorting, and barcoding

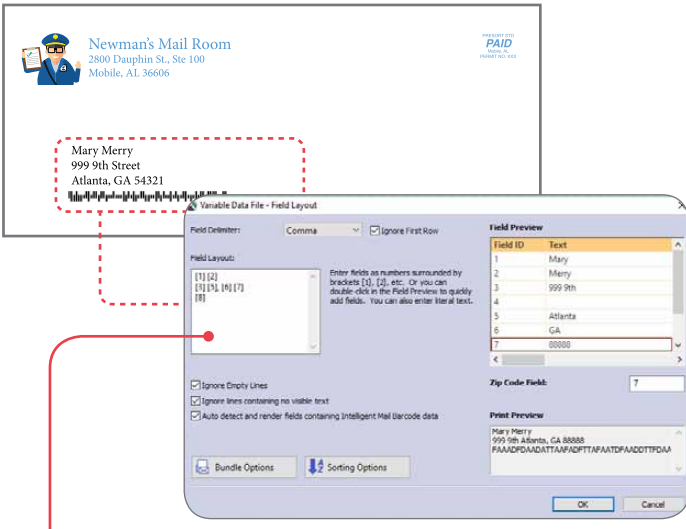

iQueue 14 now gives you complete end-to-end control for preparing direct mail with iQueue Mail™. Upload your variable data to iQueue and have it fully verified, corrected, sorted, and barcoded to USPS® presort specifications and returned to you in seconds. iQueue Mail automatically marks bundles and trays for simple automation. No more dealing with massive PDFs for your large mailings, it's all done inside iQueue in seconds. iQueue Mail also automatically generates all the necessary tray labels and USPS® reports. It's really that easy!

Now NCOALink™ Verified!

160+ million records of individual, family and business moves at your disposal!

iQueue now includes NCOALink™ to check your mailing list for any move updates and to ensure your mailing is completely verified to USPS® standards. iQueue automatically searches the national database for individuals and businesses who have filed a change-of-address form with the USPS® and corrects your list for you. iQueue with NCOALink™ along with CASS™ and Presort keeps your mail sailing through to its destination worry-free.

Full Speed Variable Data Printing

Full Variable Data controls are fast and easy inside iQueue. iQueue's Variable Data Add-On eliminates the slowdowns associated with massive variable data mailings. iQueue places the variable data, interprets Intelligent Mail Barcodes and begins printing in seconds not minutes. Reprints are fast and simple.

Complete, Accurate Job Cost Estimator

Without even printing the first print, iQueue 14 gives you a fast and complete job cost for your entire print run. iQueue uses its powerful Adobe® Postscript® interpreter to quickly calculate CMYK toner coverage and all other consumables use. You can even add media and other costs. There are no surprises with iQueue 14 working for you.

Powerful Sequential Numbering

Forms, tickets, cards, or anything that requires numbering is easier than ever to print with iQueue 14. Serialize any job with incrementing or decrementing numbers automatically at the time of printing. Eliminate wasted time spent collating with iQueue 14's imposed stack order printing. Sequence barcodes with your numbering for more automation. Multipart forms automation inside iQueue is a breeze. Variable data, sequential numbering, imposed stack order printing and barcodes all combined together inside iQueue gives you powerful tools for maximum profitability.

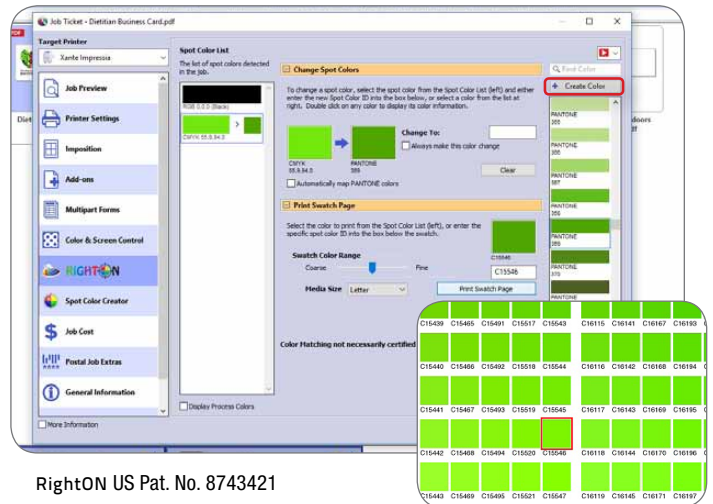

Quickly and Easily Create:

- Multipart Forms
- Numbering
- Skip Numbers
- Repeating
- Numbers
- Zero Padding
- And Add Text

RIGHTON Patented Spot Color Matching System

iQueue can match any spot color that can be created with CMYK dead-on every time. Xante's patented RightON® color matching technology makes spot color matching simpler than ever. Our unique ability to print swatch pages on your media gives you amazing accuracy and iQueue easily saves colors for future use and consistency. With RightON® you can also edit any spot color with CMYK, HSV or RGB color controls.

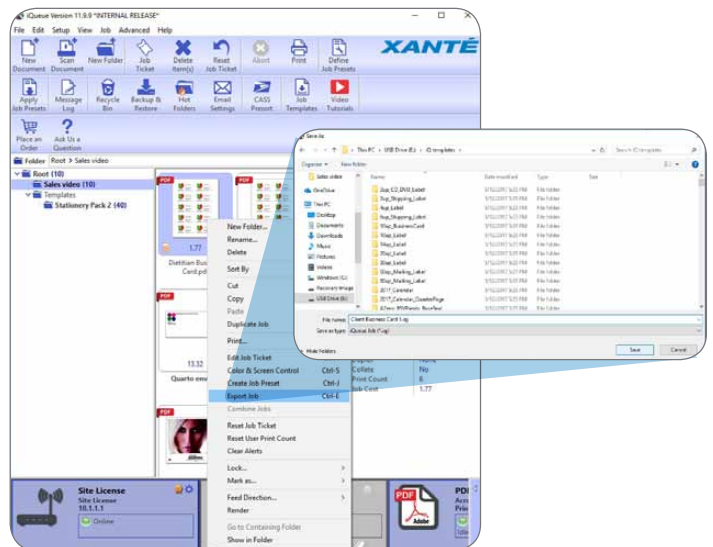

RightON US Pat. No. 8743421

iQueue's Powerful Add-On Tools keep jobs on your shop floor!

Adding text, barcodes, QR codes, lines, boxes, circles or images with or without variable data to any job is quick and simple with iQueue 14.

Save Jobs as Templates for Advanced Automation

With a simple click iQueue automatically saves any job setup as a template for future use. No reason to repeat steps with iQueue.

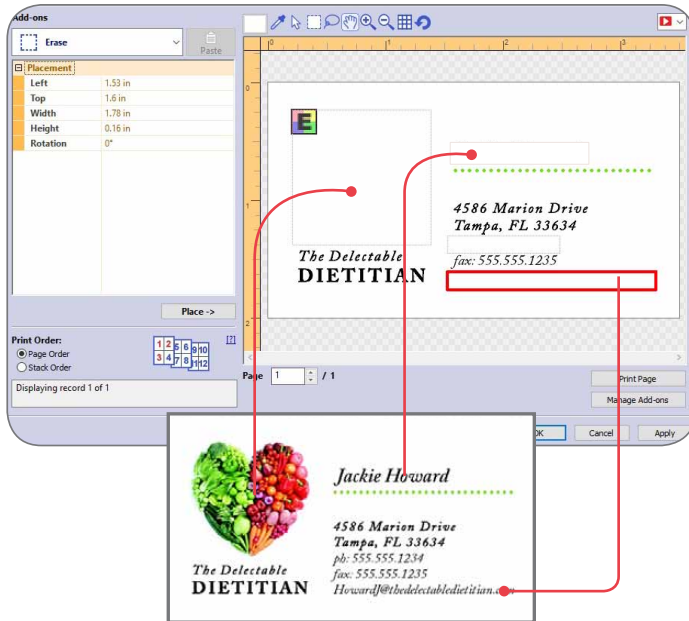

Integrated Erase Tool!

Ever want to erase items from a PDF without having to create new artwork? iQueue solves that with a simple erase tool.

Erase anything on any page of any job quickly and easily right on the shop floor.

Over a Thousand Job Ready Design Templates!

One click gives you access to an extensive and ever-growing library of print-ready design templates to help you add value to the service you provide your clients. Download full wedding packages, business stationery, party invitations, graduation announcements, and much more with easy-to-personalize text and images ready for editing in iQueue. Whether or not you have in-house design tools or expertise, these downloadable job templates give your operation an extra specialty to help you stand out from your competition.

PANTONE® Color Library

Now the iQueue spot color database includes the PANTONE® Color Library. This provides access to PMS color builds when using Right-On.

Multipart Form Design Capabilities

The Multipart forms feature will not only allow users to set individual characteristics for each page of a multipart form, but also pull from different paper sources, print on different media and stocks, and add sequential numbering.

JDF Compliant!

iQueue 14 allows JDF Job Ticket messaging and Device Control language.
