

Light Green Emerine Necklace Therapy

Pain Relief

A Light Green Emerine necklace is placed on a painful area to soothe it and accelerate its healing.

Therapy Tool

One therapeutic Light Green Emerine necklace

Indications

Any area of the body is experiencing pain—for example, following injury or surgery

Effects

Placing Light Green Emerine on a painful or injured area relieves pain and accelerates the area's healing. Much physical pain has an emotional component. This therapy also helps relieve the emotional aspect of pain. The action of this therapy—

- Creates a wave motion from the necklace into the body and then back to the necklace
- Aventurine encourages the release of the most discordant energy, and the Emerald neutralizes it
- Helps the body correct mismatched tissue healing
- Amplifies the identities of severed pieces of tissue; assists the body to accurately reunite them
- Creates a column of energy from the physical body to the emotional body
- Dissolves and releases emotional anchors and anchor lines
- Soothes the corresponding area of the emotional body

Procedure

Place the Light Green Emerine on the painful area. Arrange the necklace either in a pile or in a circle around the painful area.

Time Guidelines

Keep the necklace in place as long as possible.
