About

I am Marie Graff the owner and creative soul behind the Danish design company Kodanska. Kodanska, translating to 'Copenhagen Street' from Czech to Danish and is the name of the street in the heart of Prague where I lived with my family for four years.

Inspired by our life in Prague and my roots back in Denmark, I chose the name 'Kodanska' as a good way to tell my personal story, portray family values and ideas behind every design collection. Every single design has its own personal story.

I find inspiration in the history behind the high quality of handmade materials in Europe, and my love for the colourful city of Prague combined with the simplistic Nordic design style. My focus is on shapes, colours, the quality of the process of handmade work, and the aesthetics of the final result.

I'm Not Perfect Collection

“I’m not perfect but unique” COLLECTION

This is our new collection: I Am Not Perfect - But Unique.
It is truly a symbol of a unique collection.

Our new collection is created as part of a larger no waste production, where 100% of the materials are used. We want to take better care of our planet by reducing the waste of resources.

When you are working with glass, you see the most beautiful pieces being cut off and dumped. At Kodanska we go back and look at all our designs, re-design and think; How can we in the future make a production without any waste of these beautiful and unique pieces? Everything we did in this collection, is a huge step forward in our future of production. We are just getting started...

See the whole process in our new brand video right here.

I AM NOT PERFECT CANDLE HOLDER SMALL – SPECIAL DESIGN ORDER

New 'Faith' Vase

Faith means belief. For Marie, designer and owner of Kodanska, it's all about surrounding yourself with people who believe in you. When we focus on our strengths and feel that people around us believe in us, it creates security, a sense of calm and a sense of security that enables us to perform at a much better level.

The Faith vase will always be completely unique and unpredictable in its expression, due to the way it is shaped. The vases are all mouth-blown, the top is hand-cut so that each individual vase appears completely unique. The sculptural expression of the vase makes it beautifully both with and without flowers in it.

See our new Faith video right here.

The Road

COLLECTION

The Road Vase is designed by Marie Graff and is a symbol of curvy roads ahead. There is no easy road in life, buckle up, enjoy the present moment and create your own unique path in life.

The shape of the vase comes from a road trip Marie and her family have been on in Canada. The Canadian nature is wild and beautiful just like the road of life ahead of us. The important thing is not so much where the road takes us, but how we deal with the challenges we meet on our way and who we have with us on the journey.

The Road vase will be completely unique, both because our path through life is unique and our own, but also because the vase is mouth-blown and created with a completely unique method we have invented for this particular vase.

The Road Vase, is dedicated to Marie's teen daughter Liva, as a kind reminder, that no matter where you are in life, there will always be curvy roads ahead. If you catch the day with an open mind and willingness to learn the curvy roads will take you places that you had never dreamed possible.

All vases are handmade and "one of a kind" - just like you.

Havana Banana

COLLECTION

Every single one of our designs has its own story. A story of craftsmanship and quality. The 'Havana Banana' collection is a series of mouth-blown products characterized by exceptional quality and a distinctive expression.

Our inspiration for the colour patterns originally came from seeing a sundress with a beautiful variety of yellow and brown nuances, which turned out to be our new Havana Banana colour. Under our production process the brown colour was by mistake mixed up with a green colour and all of a sudden, we had a whole new visual design. This colour combination turned out to be perfect as one of our colour lines for our Havana Banana bowls.

The colours in the 'Havana Banana' collection are in a category of their own. The collection is an extension of our Easter Egg collection launched in early spring 2021, where we chose to continue to develop the colours from the collection, which evolved into the 'Havana Banana' collection in four specially designed colours: Banana Split, Cotton Candy, Banana Green and Banana Pink - the product names are just as tempting as the design itself.

Flow COLLECTION

The Flow collection is an award-winning series as our Flow vase won the popular Danish Design Award "product of the year" at Formland trade fair in spring 2020. The collection is made in "free-hand", three layers of glass and no two products are alike - each and every Flow product is unique.

With our design process we had a desire to burn fabric into glass to explore a new and different expression.

But our ideas literally burned up, as textile and glass have different melting points. In partnership with our skilled glass blowers in Czech Republic, we were inspired by the process and our thoughts and ideas went in the direction of stripes, shapes and colours - and after a couple of technical adjustments the vases came out just the way we wanted them.

"We love the artistic expression of our "Flow" collection and wanted to see if we could mix our two collections "Flow" and "Danish Summer". We did not want one collection to exclude the other; instead, we wanted to be able to combine them in order to create an artistic and personal home design expression that combines classic, wild and colourful elements".

Our Flow collection is a new and innovative element in Nordic table setting. In combination with our classic Danish Summer glasses, they make for a lively expression with plenty of colour and personality.

Danish Summer

COLLECTION

Our popular Danish Summer collection is hand blown from the highest quality of glass from Bohemia, Czech Republic. The collection is inspired by the rainy Danish summer where the structure on the glass reflects drops of rain.

“We love creating different table settings with a mix of colours. It's great to have this many colours to choose from - in this way, there will always be one that suits our mood. With a colour range from delicate pink to dark green, the collection can both contribute to the more distinctive interiors or create a relaxing atmosphere”.

Choose a single colour for a harmonious expression or mix and match the colours for a more bohemian look.

Happy Apple

COLLECTION

Our 'Happy Apple' collection is a series of handmade apples in beautiful, pastel green colors. Every single apple is mouthblown and therefore completely unique in expression and color. The apples contain a variety of decorative purposes, as they function both beautifully as part of a table setting or as part of small 'still lebens' in the home.

Use the apple as a visual element of the windowsill, as a beautiful eye-catcher in a personalized table setting or as part of a beautiful and imaginative Christmas environment. In addition, the apples are obvious as a personal and original hostess gift.
