

SPRING/SUMMER 2024

XEROSHOES®

“There is no reason to start another shoe company...**unless your shoes change people’s lives!**”

–**Lena Phoenix**, President/Co-Founder

OUR STORY

In 2009, after suffering years of running injuries, Steven Sashen was inspired by the book *Born to Run* to get out of his traditional padded, motion-control shoes and began running barefoot. This change naturally inspired a movement in his form that eliminated injuries and helped him become a Masters All-American Sprinter at age 45, after 30 years away from competition.

Wanting to have this experience all day, every day, he started making sandals for himself and other local runners. And then, in November 2009, Steven and his wife Lena uttered those dangerous entrepreneurial words —“How hard could it be?” — and began selling DIY sandal kits out of their living room.

Today, Xero Shoes is one of the world's top natural movement shoe brands, with over 1 million customers in over 97 countries. Their product line still includes sandals, but has expanded to over 40 designs including casual and performance shoes and boots for every activity.

Xero shoes have helped over 1 million people discover the comfort, fun, and benefits of natural movement—and how to Live Life Feet First. To hear the full story, check out the [How I Built This](#) podcast on NPR.

**Steven Sashen
& Lena Phoenix**

VISION

Enhancing the foundation
for everything your body does.

MISSION

Revolutionizing Health and Wellness
by incorporating Natural Movement
into everything we do.

NATURAL DESIGN IS OUR DNA

Xero Shoes® let your feet move the way nature intended, with the protection and style you're looking for.

NATURAL FIT

Wide toe boxes let your toes spread and relax. "Zero-drop," non-elevated heel for proper posture.

NATURAL FEEL

Flexible soles let your foot bend and flex naturally. Low-to-the-ground design for balance and agility.

NATURAL MOTION

Our patented FeelTrue sole lets you safely Feel The World, protecting your foot while giving your brain the feedback and stimulation your brain wants.

AUTHENTIC SUSTAINABILITY

Our company is called Feel the World, Inc. not just because of how you connect to the world in our shoes but because we want to minimize the ecological impact of footwear manufacturing. We don't "greenwash." We share our authentic commitment to the environment.

BUILD IT TO LAST

Most running shoe brands tell you to replace your shoes every 200-500 miles. With our 5,000 mile sole warranty, Xero Shoes stay on your feet, not in a landfill.

USE LESS

With fewer components (e.g. no foam midsole), Xero Shoes put less strain on the environment and take less energy to produce.

SOURCE BETTER

Whenever possible and practical, Xero Shoes use environmentally-friendly components like hemp canvas, and recycled and biodegradable materials.
