# OFF-ROAD LED

Powersport vehicles, motorcycles, ATVs, UTVs, snowmobiles and PWCs.

## What type of LED do we use?

FARENHEIT is always at the forefront, that's why we use CREE and EPSTAR lighting technology. The most advanced LED light technology.

## Lumens

Lumens is used to measure the brightness of the visible light.

## Watts

Watts, is the amount of electricity that a lighting device requires to produce light.

## Spot Beam

The Spot, produces a powerful beam of light to illuminate a narrow area 30 degrees, and allows a greater visibility distance while drive at night.

## iP 68

FARENHEIT uses the best levels of protection. Ingress Protection (IP) is a level of protection rating. When a product has the level of protection rating of IP68, this unit has a total protection against dust (the number "6") plus it is water resistant (the number "8").
