

SOUND BOX

DIFFERENCE YOU FEEL

PRODUCT
CATALOG **2019**

THE SOUNDBOX DIFFERENCE...

We build a system with the best audio components, even adding audio enhancing products to further improve sound quality. Still, with all these components added the most important element, of a quality system, is the subwoofer enclosure.

At SoundBox we understand the importance of the enclosure, and we do not cut corners when it comes to the build of our products. We have built quality from day one, and we will continue to do so.

SoundBox started as an enclosure company and will remain an enclosure company. Be it our vehicle specific enclosure line, our universal line of enclosures, or our SPL line of enclosures we are certain you will feel the difference.
