

# LIGHTWEIGHT T-SHIRTS

# HEAVYWEIGHT T-SHIRTS

Do you want to feel comfortable in your tee across the seasons? Then T-shirt weight is a feature to understand and look out for.

## LIGHTWEIGHT T-SHIRTS

**GSM**  
Under 160

**FABRICS**  
Cotton and innovative new lightweight fabrics, like Lyocell.

**BEST IN**  
Summer and hot weather

## HEAVYWEIGHT T-SHIRTS

**GSM**  
Over 200

**FABRICS**  
Premium heavyweight cotton. Wool and hemp can also work.

**BEST IN**  
Autumn, winter, and cold weather

## WHAT IS GSM?

It stands for '**GRAMS PER SQUARE METRE**' and is a measure of how thick the fabric is.

A T-shirt with a higher GSM will be thicker and weightier.

**> 200**

And the lower the GSM, the lighter the t-shirt would be.

**< 160**

**Looking for your perfect T-shirt?**

Take the weight into account, that's what we say.

Check for the GSM and buy something that suits the season.

It's the way to look and feel comfortable.
