

ZOLO™

- 1 EN Insert 4 x AA batteries as shown into the controller. Make sure bottom cap of the controller is screwed tightly closed.**
- FR Insérez 4 piles AA comme indiqué dans le dispositif de commande. Assurez-vous que le couvercle inférieur du dispositif de commande est vissé et bien fermé.
- DE Setzen Sie 4 AA-Batterien wie abgebildet in den Controller ein. Vergewissern Sie sich, dass der Deckel an der Unterseite des Reglers fest verschlossen ist.
- ES Inserte 4 pilas AA como indicado en el controlador. Asegúrese de que la tapa inferior del controlador esté atornillada y bien cerrada.

- 2 EN Remove the bottom cap of your BlowPro before use. Recommended to lube yourself with water based lubricant before inserting your manhood into your BlowPro.**
- FR Retirez le couvercle inférieur de votre BlowPro avant usage. Il est recommandé de vous lubrifier avec un lubrifiant à base d'eau avant d'insérer votre membre viril dans votre BlowPro.
- DE Entfernen Sie den Deckel an der Unterseite Ihres BlowPro vor Gebrauch. Wir empfehlen reichlich Gleitgel auf Ihrem besten Stück zu verteilen, bevor Sie dieses in den BlowPro einführen.
- ES Quite la tapa inferior de su BlowPro antes de uso. Es recomendado lubricarse con un lubricante a base de agua antes de insertar su virilidad en el BlowPro.

- 3 EN To turn your BlowPro ON, press the ⏻ button on the controller. Your BlowPro will start at the lowest speed.**
- FR Pour mettre votre BlowPro sous tension, appuyez sur le bouton ⏻ sur le dispositif de commande. Votre BlowPro s'activera à la vitesse la plus lente.
- DE Drücken Sie die ⏻ Taste an der Fernbedienung, um Ihren BlowPro zu starten. Der BlowPro wird bei der langsamsten Geschwindigkeit anfangen.
- ES Para encender el BlowPro, pulse el botón ⏻ en el controlador. Su Blowpro se activará a la velocidad mínima.

- 4 EN To increase stroking speed, press the ⏸ button. Pushing the button once will advance to the next speed.**
- FR Pour mettre votre BlowPro sous tension, appuyez sur le bouton ⏸ sur le dispositif de commande. Votre BlowPro s'activera à la vitesse la plus lente.
- DE Drücken Sie die ⏸ Taste an der Fernbedienung, um Ihren BlowPro zu starten. Der BlowPro wird bei der langsamsten Geschwindigkeit anfangen.
- ES Para encender el BlowPro, pulse el botón ⏸ en el controlador. Su Blowpro se activará a la velocidad mínima.

- 5 EN Recommend to always clean after use. Rinse out your BlowPro with luke warm water. Toy cleaner or mild soap can also be used. Allow your BlowPro to air dry. Once dry, put the cap back on for long term storage.**
- FR Il est recommandé de toujours nettoyer après usage. Rincez votre BlowPro à l'eau tiède. Un nettoyant pour jouets ou un savon doux peut également être utilisé. Laissez votre BlowPro sécher à l'air. Une fois sec, remettez le couvercle en place pour un rangement sur le long terme.
- DE Wir empfehlen den BlowPro nach jeder Verwendung zu säubern. Säubern Sie Ihren BlowPro mit lauwarmem Wasser. Sie können außerdem Spielzeugreiniger oder milde Seife verwenden. Lassen Sie Ihren BlowPro an der Luft trocknen. Sobald er trocken ist können Sie den Deckel zur langfristigen Lagerung wieder verschließen.
- ES Es recomendado siempre limpiar tras uso. Enjuague su BlowPro con agua templada. También se puede usar un limpiador para juguetes o un jabón suave. Deje su BlowPro secar al aire. En cuanto esté seco, ponga de nuevo la tapa inferior en su puesto para un almacenamiento a largo plazo.

Warning:

This item is sold as an adult novelty only. Item does not contain phthalates and it is recommended to use water-based lubricants. Should any irritation or discomfort occur, stop using this item immediately. The usage of this product is in no way a means to warrant any medical claims.

Avertissement:

Cet article est uniquement vendu en tant que fantaisie pour adultes. Cet article ne contient pas de phtalate et il est recommandé de l'utiliser avec un lubrifiant à base d'eau. Si vous ressentez la moindre gêne ou irritation, cessez d'utiliser cet article immédiatement. L'usage de ce produit n'est en aucune façon un moyen de réclamer une indemnité médicale.

Warnung:

Dieses Gerät wird ausschließlich als Scherzartikel für Erwachsene verkauft. Das Gerät enthält keine Phthalate. Desweiteren wird empfohlen wasserbasierten Lubrikant zu verwenden. Sollten während der Anwendung Irritationen oder Unwohlsein auftreten, beenden Sie die Anwendung sofort. Es werden keine medizinischen Behauptungen oder Gewährleistungen auf Basis der Nutzung dieses Produkts garantiert.

Advertencia:

Este artículo es solamente vendido como novedad para adultos. Este artículo no contiene ftalatos y recomendado usarlo con un lubricante a base de agua. Si siente molestia o irritación, deje de usar este artículo de inmediato. El uso de este producto no es de ninguna manera un medio para justificar una reclamación médica.

CONSTRICTION RINGS

WARNING!

- Do not fall asleep while wearing the constriction rings. Prolonged use of a ring may lead to permanent penis injury.
- Allow for at least 60 minutes between uses. Frequent usage may increase the risk of penis injury.
- Avoid the usage of constriction rings while under the influence of alcohol or drugs, as this may impair the user's judgement and increase the risk of penis injury.
- Misuse of constriction rings may result in bruising, painful injury, or permanent damage to the penis.
- Constriction rings, in any form or factor, do not prevent the risk of pregnancy.

PRECAUTIONS

- Limit the use of constriction rings to no more than 30 minutes per session.
- Prolonged use of the constriction rings (without removal from the penis) may cause permanent penis injury.
- Use of constriction rings may aggravate existing medical conditions including Peyronie's disease¹, priapism² and urethral strictures³.
- Constriction rings may bruise or rupture blood vessels within the penis or scrotum, resulting in petechiae⁴, hemorrhage⁵, or the formation of hematoma⁶.
- Use the least constrictive silicone ring size that maintains an erection to avoid excessive constriction that may cause penis injury.

¹ Formation of hardened tissue in the penis that causes pain, distortion during erection
² Painful erections that persist as a result of disease
³ An area of hardened tissue that narrows the urethra, making it difficult to urinate at times
⁴ Small purplish spot on body surface caused by a minute hemorrhage
⁵ Flow of blood from ruptured blood vessels
⁶ Localized swelling filled with blood resulting from a break in a blood vessel

VACUUM PUMPS

WARNING!

- Cease usage of the vacuum pump if pain occurs.
- Avoid the usage of the vacuum pump while under the influence of alcohol or drugs, as this may impair the user's judgement and increase the risk of penis injury.
- Do not use if the user has sickle cell disease, a history of prolonged erections, or is taking large quantities of aspirin or other blood thinners. These conditions may increase the risk of bruising and hematoma.
- Misuse of of the vacuum pump may cause penis injury.

PRECAUTIONS

- Apply only the minimum amount of vacuum pressure necessary to achieve an erection. Excessive vacuum pressure may bruise or cause penis injury.
- Use of the vacuum pump may aggravate already existing conditions such as Peyronie's disease¹, priapism² and urethral strictures³.
- Use of the vacuum pump may bruise or rupture the blood vessels within the penis or scrotum, resulting in petechiae⁴, hemorrhage⁵, or the formation of hematoma⁶.
- If appropriate the labeling should instruct patients not to use an electrically powered vacuum pump or near water.

CAUTION

- Avoid over-vigorous pumping.
- This product is intended for the use by a single user.
- The vacuum pump should NOT be used for more than 15 minutes continuously and should not be used within 24 hours of its use.
- Do not fall asleep while using the vacuum pump, or while under the influence of alcohol or drugs. The user needs to be in control of the product at all times.
- Consult a doctor before using the vacuum pump if the user experiences any discomfort in the genital area.
- The user must be in full control of his hands to safely use the device with the strength to push the pressure release button.

DEVICE PURPOSE

- The device is an external penile rigidity device using vacuum technology.
- The device is also intended to maintain optimum penis health and sexual stamina, through regular exercise of the penis by erection using a safe level of vacuum pressure.

The following precautionary measures are advised when using the device.

As the device may cause sexual arousal with increased heart and respiratory rates, users should consult their doctors before using the device if they suffer any of the following: heart or lung disease, high blood pressure, stroke, epilepsy or convulsant disorder, uncontrollable diabetes or genital-urinary disorder (kidney, bladder, testicular or penile problems etc). Consult a doctor before use if user consumes anticoagulants or have sickle cell anaemia, bleeding disorders or leukemia.

PRECAUTIONS FOR CONSTRICTION RINGS AND VACUUM PUMPS

DELAYED DIAGNOSIS OF OTHER CONDITIONS

If the user has symptoms of erectile dysfunction (i.e. inability to achieve an erection that is sufficient for sexual intercourse) consult a doctor prior to using this device to avoid any potentially harmful delay in diagnosing any of the most common causes of this condition.

USE WITH IMPAIRED PAIN PERCEPTION

Do not use the device if the user has decreased sensation of pain in the penis region. This warning should inform the user if he cannot feel pain, he may not know if the device is causing him harm or injury.

USE WITH DECREASED HAND STRENGTH

Do not use the device if the user has decreased hand strength as this may make the removal of the device difficult.

TROUBLESHOOTING GUIDE

PROBLEM	CAUSE	SOLUTION	NOTES
No erection	No vacuum due to air leak from poor seal	- Use more lubricant - Apply firm pressure to body - Trim pubic hair - Check device for air leaks	Problems are most often associated with inexperience from using the device
Partial erection	- Incorrect insert or seal ring size - Inexperience in operating the device	- More practice from using device - Use larger cylinder insert	Problems are most often associated with inexperience in operating the device
Rapid loss of erection (no more than 5 minutes)	- Vacuum loss due to air leak from faulty equipment - Poor seal - Inadequate lubrication - Excessive pubic hair	- Use more lubricant - Apply firm pressure to body - Trim pubic hair - Check device for air leaks - Use smaller cylinder insert - Use smaller or double tension rings - Remove tension band carefully	- Problems are most often associated with inexperience from using the device - Consult a physician if problem occurs
Rapid loss of erection (no more than 5 minutes)	- Vacuum loss due to air leak from faulty equipment - Poor seal - Inadequate lubrication - Excessive pubic hair	- Use more lubricant - Apply firm pressure to body - Trim pubic hair - Check device for air leaks	
Pulling of the skin of the scrotum	Insufficient tension from bands or rings	- Remove lubricant from scrotum - Angle the device downwards when in use	- Problems are most often associated with inexperience from using the device
Experiencing any discomfort or pain while device is in use	- Too rapid pumping - pulling of scrotal tissue	- Slower pumping - Continue to use device	- Problems are most often associated with inexperience from using the device - Consult a physician if problem occurs
Having redness, irritation or bruising	- Too rapid pumping - Over pumping	- Slower pumping - Fewer pumps	- Problems are most often associated with inexperience from using the device - Consult a physician if problem occurs
Feeling a cold penis (to you and your partner)	- Constriction of blood flow to the penis - Lubrication	- Wash off lubricant or warm lubricant before use	
Penis pivots on its base	- Constriction of blood flow to the penis	- If manageable, apply the device after you have a partial erection
