

# ECONEX GARAGE TILE

The Econex Garage Tile, is made from 100% recycled TPE (Thermoplastic Elastomer). A lot of waste is created each year from NZ's plastic manufacturers, so we source the raw material waste from them, and together with an injection moulder, turn the waste into hard wearing garage tiles.

CODE	DESCRIPTION	SIZE (mm)
<b>Econex Garage Tile</b>		
ECX5050-BLK	Black	500 x 500

\*Mat sizes may vary +/- 5%

## FEATURES
