

# FIBREGLASS STAIR NOSING DUAL

Fibreglass Stair Nosing is a simple, lightweight and cost effective way of making slippery steps and edges safe for all pedestrians. The heavy duty coarse grit finish provides an anti-slip surface and the tapered edge prevents a trip hazard. As an additional measure, Stair Nosing is available with a safety yellow edging to clearly highlight the step edge. This means that even in low light areas, they are easily identified by personnel as a safe area to step on.
