

FLOOR GRIT

Designed to eliminate problems in areas that have been identified as a significant slipping hazard. These plates will assist users in managing these areas with confidence as well as having the assurance of a product that is high in performance and reliability. Even in the most slippery environments (with the presence of water, oils and other slippery substances), the non-skid grit plate's anti-slip capabilities remain unaffected.

CODE	SIZE (mm)
Floor Grit - Flat Panel
