

# MULTIPRO ERGO

The MultiPro Ergo open and closed tiles allow for a multitude of uses. It is an excellent matting system where traffic volume is high and stability under foot is required. The lower profile allows the user to transfer on and off the mats with minimal worry of trips or falls. The half size tiles, compared with the other MultiPro tiles, can be used where the full tiles are not required and where daily cleaning is required as they can be easily removed with no fuss.

| CODE                      | DESCRIPTION                          | SIZE (mm) |
|---------------------------|--------------------------------------|-----------|
| <b>MultiPro Ergo</b>      |                                      |           |
| MEC5025                   | MultiPro Ergo, Closed                | 500 x 250 |
| MEO5025                   | MultiPro Ergo, Open                  | 500 x 250 |
| <b>MultiPro Ergo Ramp</b> |                                      |           |
| MER50-SM                  | MultiPro Ergo Ramp, Male             | 500 x 65  |
