

# NEEDLEPUNCH CARPETS

## MAINTENANCE & CLEANING GUIDE

### 1. Introduction

AMS's Needlepunch carpet is made from 100% Polypropylene & is a non-woven construction. The construction of Needlepunch carpet give is excellent durability, stain resistance & stability. Needlepunch carpet is incredibly low maintenance & cost effective.

The purpose of maintenance is to ensure that the durability is maximised, and appearance maintained, lengthening the usable life of the product.

### 1. Cleaning Instructions

#### VACUUMING:

- Vacuum regularly, especially in high traffic areas. Frequent vacuuming removes the debris & dirt before they become embedded in the base of the carpet.
- We recommend a light vacuum twice weekly and a thorough vacuum weekly.
- Vacuums with scrubber/revolving brush attachments are not recommended as they can pull the fibre.

#### SPILL/SOIL REMOVAL

- **IMPORTANT:** Remove spills & soil quickly to avoid it becoming a stain.
- Use a white, absorbent cloth or paper towel to absorb any liquids, or add warm water if needed.
- Blot the spill, rather than scrubbing to ensure the yarn is not damaged.
- Be patient. If the stain comes back after cleaning, repeat the steps. Stains may have reached the base of the carpet and re-appear at the top over time.
- Spot & Stain removal products can be used in accordance with their dilution & use recommendations. We recommend trialling these on a hidden area of carpet to test to any reaction.
- Rinse the area with warm water after and blot the area dry with a dry towel again.
- Solid soil/stains (stains that have dried), should be scraped off the carpet using a spoon or a similar blunt utensil.
- If unsure, we suggest calling a carpet cleaning professional.

#### PROFESSIONAL CLEAN

- We recommend a yearly professional clean to keep your carpet in top condition.
